I'd like to mark as State's  Exhibit A the notice of hearing, the certificate of mailing, and the certified return receipt.  MR. GEARHISER: No objection to Exhibit A, Commissioners.  CHAIRMAN MCNAMARA: It will be admitted.  MR. LAMPKE: Kurt, I don't know if you have an objection to Exhibit B, which will be the investigative report.  MR. GEARHISER: Oh, yeah.  CHAIRMAN MCNAMARA: Yes, you have an objection?  MR. GEARHISER: I certainly have an objection, and I've got a witness here who will testify to it.  MR. LAMPKE: With that then, we can just oh, and then finally State's

2 (Pages 2 to 5)

	Page 6		Page 8

20	a seat.	20	A. The Form 17 is logged in our	
21	Everybody out?	21	complaint book for all agents to view. When	
22	MR. LAMPKE: Yes.	22	an agent is working in a certain area, like a	
23		23	county or assigned to a county, he will go to	
24	ROBERT ANDERSON	24	the complaint book, that agent will go to the	
	Page 7		Page 9	
1		1	complaint book and view the complaints in that	
2	DIRECT EXAMINATION	2	county and visit those, do an investigation on	
3	BY MR. LAMPKE:	3	those at that time.	
4	Please state your name and	14	O And did Meigs County fall in the	

- Please state your name and 4 Q.
- occupation for the record.
- 6 I'm Agent Robert Anderson. I work
- 7 for Ohio Department of Public Safety,
- 8 Investigative Unit.
- 9 Q. How long have you been in that
- 10 position?
- 11 Α. Approximately 12 years.
- 12 And describe your job duties in the
- 13 areas and the area that you cover.
- 14 I investigate crimes in Ohio that
- 15 involve liquor permit establishments,
- including liquor laws, tobacco laws, and food 16
- 17 stamp fraud.
- 18 Q. And the area that you cover?
- 19 A. Oh, excuse me, Athens County; it's
- 20 all south and eastern Ohio. It's 18 counties.
- 21 Do you know roughly how many liquor
- 22 permit premises are in those counties?
- 23 Α. I couldn't say for sure.
- 24 Q. How many agents are assigned to

- n that
- n on
  - Q. And did Meigs County fall in the
- month of December when you were conducting
- 6 investigations?
- 7 That's correct. I believe the
- complaint was filed in June of 2004, and we
- 9 visited in December of that year. We were in
- 10 the area, the complaint was on for various
- 11 things, I'm not positive exactly what it was
- 12 on for, but we conducted an administrative
- investigation at that time. 13
- 14 And you're talking about the Q.
- 15 investigation of FOE Aerie 2171?
- 16 A. That's correct.
- Okay. What did you do when you --17
- 18 how did you conduct the investigation for FOE
- 19 Aerie?

21

- 20 A. Myself and four other agents went
  - and visited the permit premises. We buzzed
- 22 the buzzer. We were allowed access. We went
- 23 in and properly identified ourselves to
- 24 individuals that were in charge there at the

3 (Pages 6 to 9)

Dago	1	n
PAGE		

- 1 time and advised them we were there to conduct
- 2 an administrative inspection.
- 3 Q. And what did you observe on entering
- 4 the premises?
- 5 A. Upon entering the premises, I
- 6 observed what I believed were three electronic
- 7 video slot machines that were located on the
- 8 left-hand side of the bar; as you walk through
- 9 the door, they were on the left, over on the
- 10 left.
- 11 Q. Were the machines located in the
- 12 main room?
- 13 A. Yes, the main bar area.
- 14 Q. They were not located in a separate
- 15 area of the facility?
- 16 A. No, they were not.
- 17 Q. Did you observe anyone playing
- 18 these machines?
- 19 A. I don't believe so.
- 20 Q. Did you play the machines?
- 21 A. Yes, I did.
- 22 Q. What did you observe when you played
- 23 the machines?
- 24 A. I placed a dollar in this machine,

- Page 12
- 1 lose like \$.60 or I'd lose like \$.70, or I'd
- 2 lose like \$.50.
- 3 Q. So the machine would present you
- 4 with \$.30 or \$.40 out of a \$1.00 wager that
- 5 you made?
- 6 A. Yes, yes.
- 7 Q. Did you successfully complete the
- 8 task each time you played it?
- 9 A. Yes. This particular day, yes.
- 10 Q. Okay. And then what did you do once
- 11 you finished playing the machine?
- 12 A. Like I said, I determined it to be
- 13 an electronic video slot machine. We
- 14 confiscated the monies, Agent Ginther, I
- 15 believe, confiscated the monies. And we
- 16 confiscated the machines as gambling devices.
- 17 Q. How much money did you confiscate
- 18 out of each machine?
  - MR. GEARHISER: Objection. He just
- 20 testified that Agent Ginther confiscated the
- 21 money.

19

22

- CHAIRMAN MCNAMARA: If he knows.
- 23 A. Out of the three machines total, it
- 24 was approximately \$600: \$400 out of one

### Page 11

- 1 and upon playing it, in my experience I
- 2 determined the machine to be an electronic
- 3 gambling video machine. I've had several
- 4 cases like this before, and it was my
- 5 determination it was an electronic video slot
- 6 machine.
- 7 Q. Did you ever win a game that you had
- 8 played on the machine?
- 9 A. No.
- 10 Q. And why not?
- 11 A. I got the correct answers, but I won
- 12 no money. Every time I played, I lost money
- 13 although I got the correct answer. So I had
- 14 no winnings.
- 15 Q. Okay. You would play how much per
- 16 game?
- 17 A. Usually you bet \$1.00 or you can bet
- 18 \$.50 or -- I can't remember the other bets. I
- 19 think there's a \$4.00 bet you can do on it.
- 20 But I played it and got correct answers and
- 21 had no winnings, so.
- 22 Q. Okay. What would the computer --
- 23 what would the outcome of your play be?
- 24 A. If I got a correct answer, I would

- Page 13 machine, like 60 out of another, 190 I think
- 1 machine, like 60 out o2 out of another.
- 3 Q. Would that be reflected in your
- 4 report?
- 5 A. Yes. Evidence record document
- 6 should be attached.
- 7 Q. I'd like to show you State's
- 8 Exhibit B in front of you; can you identify
- 9 that document?
- 10 A. Yes. This is my investigator's
- 11 report.
- 12 Q. Could you refer to the amount of
- 13 money confiscated from each machine?
- 14 A. Yes. Out of Machine No. 1 was --
- 15 and we label them left to right. As you're
- 16 facing the machine, they were labeled left to
- 17 right. 194 out of Machine No. 1, I believe it
- 18 was \$60 out of Machine No. 2, and \$402 out of
- 19 the Machine No. 3.
- 20 Q. And did you confiscate pay-out slips
- 21 as well?
- 22 A. I don't believe so. Maybe -- I'd
- 23 have to refer to the report. Let me see.
  - Yes. Yes, there was pay-out slips

4 (Pages 10 to 13)

24

Page 14 Page 16 from the machines confiscated. Exhibit B. 1 1 2 2 Would that show evidence of income MR. LAMPKE: He has it in front of 3 3 generated from this machine? him. Yes. Shows a profit. 4 Q. If you would turn to the -- is there 4 Α. And can you recall the specific date 5 a description in there? Looks like what 5 Q. you've described as electronic video gambling 6 of the violation? 7 7 December 9, 2004. device? 8 Did you also -- did you cite the 8 A. Yes. permit holder for anything else other than 9 Q. Why is that in that report? 9 electronic video gambling device? To tell you the truth, I really 10 10 Α. Yes. They were also cited for can't say for sure. All I know is this is the 11 11 unsanitary conditions. They had liquor 12 supervisor's standing operating procedures, to 12 bottles that -- a liquor bottle that wasn't attach a description of electronic video 13 13 14 fit for potable consumption. 14 gambling device to our reports when we confiscate this. What did you find in the bottle? 15 15 Q. What part of that report is yours Insects and some debris or something Q. 16 Α. 16 17 like that, it looked like. 17 then? MR. LAMPKE: At this time, I would 18 Α. Everything. I put this together. 18 Okay, so you knew that was in there? move to admit State's Exhibit B into evidence. 19 Q. 19 20 MR. GEARHISER: I'm going to object. 20 Α. Yes, sir. We've got the investigating officer here. 21 Q. Okay. All right. Could you tell me 21 He's testified about the incidents that the similarity between your report and what's 22 22 on this machine? Because your report 23 23 occurred. 24 describes a poker machine, doesn't it, playing 24 CHAIRMAN MCNAMARA: Officer, is this Page 15 Page 17 games of cards? If you want to read it. a record that is kept in the ordinary course 1 1 Yeah, that's just one form, yes. It 2 of business in your department? 2 Α. 3 THE WITNESS: My investigative 3 works on the same basis. 4 4 Okay. Well, where are there cards report, sir? Q. 5 5 on here? CHAIRMAN MCNAMARA: Yes. 6 THE WITNESS: Yes, it is. 6 A. There was no cards. Okay. Do you bet on this particular 7 CHAIRMAN MCNAMARA: And is that an 7 Q. 8 8 -- do you draw cards on this? exact copy of your report? 9 THE WITNESS: Yes, sir, it is. 9 A. Do I draw cards? 10 CHAIRMAN MCNAMARA: We're going to Q. Yeah. 10 11 admit it for whatever value it may have. 11 Α. No. 12 MR. GEARHISER: Can I see it, 12 Q. Well, I guess I'm confused then. Why would a description of a poker machine be 13 13 Commissioners? in your particular report concerning a machine 14 COMMISSIONER GARDNER: Excuse me? 14 15 MR. GEARHISER: Can I see that? 15 that's called Tic-Tac-Fruit? MR. LAMPKE: I'm sorry, I thought I 16 A. Because poker plays several ways: 16 It can be played with dice, it can be played 17 17 gave you a copy. with cards, it can be played with any various 18 That's all the questions I have. 18 19 CHAIRMAN MCNAMARA: Cross-exam? 19 items. Poker does not mean cards. 20 20 Is this a poker machine? Does this MR. GEARHISER: Yeah. Q. 21 21 play the game of poker? - - - - -22 **CROSS-EXAMINATION** 22 A. No. 23 So would you agree that there's 23 BY MR. GEARHISER: Q. 24 If I could have you, Agent, look at 24 really no reason for that to be in your Q.

5 (Pages 14 to 17)

Page 18 Page 20 1 report? 1 COMMISSIONER GARDNER: Okay. 2 A. I think it gives some bearing on 2 BY MR. GEARHISER: 3 what the machine, type of machine, yes. 3 Agent Anderson, did you play all Q. 4 Well, let's go through it then. It 4 three machines? says after a quarter is inserted into the 5 5 No. I just played one. Α. machine. Does this machine accept quarters? Did you bring all three machines 6 6 Q. 7 7 here today? Α. No. 8 8 Q. So you would say that's not Α. No. 9 9 exhibiting the same --Q. How do you know they're identical? Quarters is U.S. currency, and that Well, they appeared to be identical. 10 10 A. Α. machine accepts U.S. currency. Do you know if they had the same 11 11 Q. Right, I understand, but my question graphics, Tic-Tac-Fruit; because there are 12 12 is, it doesn't accept quarters, correct? different editions, do you know if they were 13 13 the same ones? 14 Right. 14 Α. 15 Q. Are there five cards displayed on 15 A. Yes. the screen? 16 Q. Your testimony was that after 16 playing one time, you determined it to be a 17 17 Α. No. 18 Are you given a choice to keep five 18 gambling device, one block; that was your Q. cards or getting rid of one of the cards? testimony here today? 19 19 One session, yes. 20 Α. No. 20 A. You said one play. 21 Q. Do you have the ability to draw a 21 Q. All right, well, whatever, but I'm 22 card? 22 Α. 23 talking about one session. I played it a few 23 A. No. 24 Okay. Can you get a pair of aces 24 times. Q. Page 19 1 like your report indicates here, on this 1 Q. Okay. So it was more than just one 2 2 machine? play? 3 MR. LAMPKE: I would object at this 3 A. 4 time. The agent has testified that it's just 4 Q. How many times did you play? 5 a description of a gambling device, it's not 5 I don't recall. A. this machine in particular. 6 6 Q. Two times? 7 CHAIRMAN MCNAMARA: I think that's 7 Probably, since I'm guessing, I'll A. say six or seven times. 8 8 obvious. 9 MR. GEARHISER: I won't ask any more 9 Okay. So after six or seven plays Q. 10 questions, Commissioners. I would just ask 10 with the machine, you knew that it was a slot that that page or the entire report be thrown 11 machine? out. If we are looking at a report that this 12 12 A. In my experience, yes, I determined 13 officer prepared and his supervisor prepared, 13 it to be a video gambling slot machine. then I would certainly think somebody would Have you gone to any school to 14 Q. have reviewed it before it got to the stage in determine slot machines or skill-based 15 15 front of the Liquor Control Commission. But amusement machines? 16 I'll raise that objection at the end of the 17 17 Α. Yes, I have. 18 hearing. 18 All right. What schools have you Q.

6 (Pages 18 to 21)

I went to a school in Las Vegas,

I can't remember the course exactly.

Nevada; it was a gambling school.

And what was it called?

It was gambling for electronic video gaming

19

I can't say. I'm not sure.  Q. I thought you looked at the complaint?  A. Yes, I did.  Q. Does it say that on the complaint

7 (Pages 22 to 25)

24 Q.

23 yeah, who filed the complaint.

Yeah.

23 Commission hearings?

Yes.

24 A.

	Page 26		Page 28
1	A. Yeah, where the complaint generated	1	A. No.
2	from?	2	Q. All right. So sometime in June a
3	Q. Yes?	3	call comes in or somehow an anonymous
4	A. Yes.	4	complaint comes to the Athens district office?
5	Q. Okay. It does say that but you just	5	A. Um-hmm.
6	don't recall?	6	Q. And six months later you're down in
7	A. Right.	7	Athens and you're going to visit that
8	Q. All right. Do you know who made the	8	location?
9	complaint?	9	A. Yes.
10	A. No.	10	Q. Okay. Did you check to see if the
			- · · · · · · · · · · · · · · · · · · ·
11	Q. You don't have any idea if it was a	11	Eagles had a liquor license before you went
12	male or female?	12	down there?
13	A. No.	13	MR. LAMPKE: Objection, relevance.
14	Q. I take it it must have been an	14	MR. GEARHISER: Well, I want to see
15	anonymous complaint then, there was no name	15	why he's going down there. The whole point of
16	attached to it?	16	this questioning is the fact that the
17	A. Oh, I have no idea. We usually are	17	Regulation 79 indicates that the Commission
18	not in the practice of putting names on it	18	and/or a court of competent jurisdiction can
19	even if somebody leaves one.	19	determine whether or not the investigation
20	Q. And this wasn't one where somebody	20	conducted by the agents meets the standard of
21	came into the office, apparently?	21	reasonable suspicion, and I need to determine
22	A. I don't know.	22	that not only for this Commission but for any
23	Q. You don't know. So you don't know	23	possible appeal that may be made by either
24	anything about the complaint?	24	myself or some other agency.
	<del></del>		
	Page 27		Page 29
1	A. I did not take the complaint.		CHATDAGAN MONIANADA TI C
	•	1	CHAIRMAN MCNAMARA: I've forgotten
2	Q. Okay. So you don't know if the	2	the question now.
3	Q. Okay. So you don't know if the person who made the complaint was reliable?	2 3	the question now.  MR. GEARHISER: Do you have a liquor
3 4	<ul><li>Q. Okay. So you don't know if the person who made the complaint was reliable?</li><li>A. No.</li></ul>	2 3 4	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.
3 4 5	<ul><li>Q. Okay. So you don't know if the person who made the complaint was reliable?</li><li>A. No.</li><li>Q. So what was the you mentioned</li></ul>	2 3 4 5	the question now.  MR. GEARHISER: Do you have a liquor
3 4	<ul><li>Q. Okay. So you don't know if the person who made the complaint was reliable?</li><li>A. No.</li></ul>	2 3 4	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.
3 4 5	<ul><li>Q. Okay. So you don't know if the person who made the complaint was reliable?</li><li>A. No.</li><li>Q. So what was the you mentioned</li></ul>	2 3 4 5	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can
3 4 5 6	<ul> <li>Q. Okay. So you don't know if the person who made the complaint was reliable?</li> <li>A. No.</li> <li>Q. So what was the you mentioned something, and I think when we were down in</li> </ul>	2 3 4 5 6	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.
3 4 5 6 7	<ul> <li>Q. Okay. So you don't know if the person who made the complaint was reliable?</li> <li>A. No.</li> <li>Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you</li> </ul>	2 3 4 5 6 7	the question now.  MR. MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of
3 4 5 6 7 8 9	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall	2 3 4 5 6 7 8 9	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit.
3 4 5 6 7 8 9	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?	2 3 4 5 6 7 8 9 10	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All
3 4 5 6 7 8 9 10 11 12	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't.	2 3 4 5 6 7 8 9 10 11	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I do
3 4 5 6 7 8 9 10 11 12 13	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17	2 3 4 5 6 7 8 9 10 11 12 13	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I dowell, I knew that wasn't the case.
3 4 5 6 7 8 9 10 11 12 13 14	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint	2 3 4 5 6 7 8 9 10 11 12 13 14	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I dowell, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?
3 4 5 6 7 8 9 10 11 12 13 14 15	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even	2 3 4 5 6 7 8 9 10 11 12 13 14 15	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I dowell, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?  A. That's correct.
3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even know when?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I do—well, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?  A. That's correct.  Q. Did you check to see if they had had
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even know when?  A. June 2004.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I do-well, I knew that wasn't the case. I do-well, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?  A. That's correct.  Q. Did you check to see if they had had a license to conduct charitable gambling
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even know when?  A. June 2004. Q. How do you know it was June 2004?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I dowell, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?  A. That's correct.  Q. Did you check to see if they had had a license to conduct charitable gambling before you went down there?
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even know when?  A. June 2004. Q. How do you know it was June 2004? A. Because I do recall the date that it	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I do—well, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?  A. That's correct.  Q. Did you check to see if they had had a license to conduct charitable gambling before you went down there?  A. No, I did not. Not me personally.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even know when?  A. June 2004. Q. How do you know it was June 2004?  A. Because I do recall the date that it came in.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I do—well, I knew that wasn't the case. I do—well, I knew that wasn't illegal sales?  A. That's correct.  Q. Did you check to see if they had had a license to conduct charitable gambling before you went down there?  A. No, I did not. Not me personally.  Q. Do you know if they have a license
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Q. Okay. So you don't know if the person who made the complaint was reliable?  A. No. Q. So what was the you mentioned something, and I think when we were down in Meigs County you indicated to me that you thought the complaint might have been drug related but you weren't sure. And I know that was maybe out in the hallway, so do you recall at all today what the complaint was about?  A. No, I don't. Q. Okay. So you reviewed a Form 17 sometime in December of an anonymous complaint that came in sometime in June, you don't even know when?  A. June 2004. Q. How do you know it was June 2004? A. Because I do recall the date that it	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the question now.  MR. GEARHISER: Do you have a liquor permit, I believe, was the question.  CHAIRMAN MCNAMARA: Okay. You can answer that.  A. Okay. On the Form 17 it's indicated whether it's illegal sales and the type of permit they have on there, if it's a permit. If they didn't have a permit, one of the complaints would have been illegal sales. All right. We knew that wasn't the case. I do—well, I knew that wasn't the case.  Q. So we know it wasn't illegal sales?  A. That's correct.  Q. Did you check to see if they had had a license to conduct charitable gambling before you went down there?  A. No, I did not. Not me personally.

8 (Pages 26 to 29)

23 they do, because they did have tip tickets

24 there, and they were legal, so they do.

23 A.

24 Q.

Yes.

But you didn't take the call?

ı			Г	
		Page 30	l .	Page 32
	1	Q. While you were there and they had	1	A. Um-hmm.
	2	tip tickets, did you check to see if they had	2	Q. And you won \$.40?
	3	a license?	3	A. No.
	4	A. I believe they showed me	4	Q. You put a dollar in and the machine
	5	documentation, some type of documentation on	5	would have registered that you answered the
	6	that. I can't recall if it was a license or	6	game correctly?
	7	whether it was the proper paperwork or not.	7	A. Yes.
	8	Q. But you were shown something and	8	Q. And won a certain amount of money?
	9	that led you to believe that they had a	9	A. I don't recall what the machine
	10	license?	10	says.
	11	A. Yes.	11	Q. You just recall what you did?
	12	Q. All right. So had you ever seen	12	A. I recall what happened, yes.
	13	this machine before this investigation?	13	Q. All right, let's go over to the
	14	A. I can't remember if it was I've	14	machine. Can you step over to the machine,
	15	had contact with this machine three times.	15	please.
	16	Q. Okay.	16	Is this on so that it can be played?
	17	A. All right. And I don't know what	17	MR. LAMPKE: I don't know. Our
	18	order.	18	expert is going to testify about the machine
	19	Q. Okay. If I would tell that you this	19	and its play.
1	20	was the only this was the second of the	20	THE WITNESS: The only way I know
	21	citations issued by the Department of Public	21	how to get this thing to work is to put money
	22	Safety, would that be the point that this is	22	in it, so.
Ì	23	probably the first time you saw it?	23	MR. GEARHISER: Could you just press
	24	A. Probably, I guess.	24	the play button, see if it works.
		D 24		D 22
	4	Page 31	۱,	Page 33 THE WITNESS: There's no credits,
	1 2	Q. So you've never seen this before.  Did you ever see material on this, on	1 2	,
	3	Tic-Tac-Fruit? I mean, your district was sent	3	no points.  MR. GEARHISER: If we can get your
	4	a whole pamphlet on Tic-Tac-Fruit and I just	4	expert in here to put credits on the machine.
	5	wondered if you'd ever personally seen it?	5	MR. LAMPKE: I would object at this
	6	A. Yes, I have.	6	time. The witness is not a gambling expert.
	7	Q. So you'd read the information before	7	We have an expert to testify about play on the
	8	you went down there?	8	machine, and Mr. Gearhiser is trying to turn
	9	A. I'm not sure it was before or after.	9	him into an expert and he's a fact witness
	10	Q. Okay. But you have seen the	10	here today.
	11	information?	11	MR. GEARHISER: I'm just trying to
	12	A. Yes, part of it, yes.	12	find out whether he won or lost money, and
	13	Q. All right. You indicated, I think,	13	apparently he can't tell me, and he's just
	14	in your testimony that you had no winnings?	14	testified
	15	A. That's correct.	15	THE WITNESS: Well, I can tell you,
	16	Q. Okay. Now, you but you answered	16	I lost money.
	17	the question correctly each and every time?	17	MR. GEARHISER: Excuse me. And the
	18	A. Yes.	18	other thing is, he's testifying that he knew
ļ	19	Q. So you won some money each and every	19	after six or seven plays that this was an
	20	time, you just did not win more money than the	20	illegal device. Now, he may not be an expert
	21	money you used to play the machine; would that	21	but he's entitled to his opinion, and I'd like
	22	be correct?	22	to ask him to play this machine, and I think
			1	

9 (Pages 30 to 33)

23 I'm certainly entitled to that. If the

24 machine doesn't play and it can't play here in

23 A.

24 Q.

No.

All right. You put a dollar in?

21

22

23

24

1

2

6

7

9

right?

Page 34 front of this Commission, then, frankly, I'm 1 2 not sure that there's any violation. 3 CHAIRMAN MCNAMARA: Have you got 4 somebody that can make it play? 5 MR. GEARHISER: Yes. We will have witnesses, but they probably won't get here 6 7 today, because this hearing, I'm sure, will go 8 on. 9 CHAIRMAN MCNAMARA: Oh, you are? 10 MR. GEARHISER: Well, my understanding was that we would probably take 11 10 or 12 hours to complete this hearing. I 12 13 don't know how long it's going to take, but it will take a substantial period of time. 14 CHAIRMAN MCNAMARA: Who did you have 15 16 that understanding with? MR. GEARHISER: Well, that's been my 17 18 statement to the Commission, that we have a number of witnesses, the State has a number of 19 witnesses, and as early as January of this 20 21 year I informed them that if we had a hearing 22 on this, because of the number of witnesses we had, we would probably need a day or two of 23

24

23

24

Α.

testimony for this.

Page 36 All right. So when you entered the 1 Q. 2 premises, you did not ask for a search 3 warrant, did you, you didn't apply for a 4 search warrant? 5 A. No, we did not. 6 And you seized this property without Q. 7 getting a search warrant? 8 A. That's correct. 9 Are you aware that the liquor agents Q. don't have the authority to seize property for 10 forfeiture proceedings without a search 11 warrant on club property, on private club 12 13 property? If you don't know --Yeah, I don't know. 14 A. Okay. You indicated that you knew 15 Q. the law changed in July of 2003? 16 Well, I'm not sure when it changed. 17 A. 18 Q. But you knew it changed? 19 A. Yes. All right. If I were to tell you it 20 Q.

Page 35 1 MR. LAMPKE: At this rate, I would 2 tend to agree, but that's why I'm objecting 3 and getting to relevant aspects of the 4 testimony. 5 CHAIRMAN MCNAMARA: Yeah, I think we'll do this in order, let this witness 6 7 testify as to what he knows. 8 MR. GEARHISER: Okay. Thank you, 9 Commissioners. 10 BY MR. GEARHISER: When you entered the premises, you 11 indicated that you identified yourself to an 12 employee? 13 14 Α. Yes. All right. By looking at your 15 Q. report, it's also indicating that you 16 identified yourself and announced that you 17 were going to conduct an administrative 18 19 inspection; is that correct? That's correct. 20 Α. 21 0. All right. Administrative 22 inspections are conducted pursuant to

Regulation 4301:1-1-79; is that correct?

That's correct.

Page 37 witness or an expert. MR. GEARHISER: I'll withdraw that 3 question. 4 BY MR. GEARHISER: 5 Q. Let me get back to the question I was asking you concerning the machine. You played it six or seven times? A. Yes. Q. You won each and every time you 10 played? 11 A. 12 Excuse me, you correctly solved the Q. 13 puzzle each and every time? 14 A. Yes. 15 When you correctly solved the Q. 16 puzzle, what occurred? It says that that's correct or 17 A. something like that, or something of that 18 19 nature, and then it gave me an amount of like \$.40, which was \$.60 less than my wager. 20 21 Okay, that's what I'm getting to. Q. 22 Okay, I probably wouldn't have had to have you

Okay, so when you correctly answered

changed in July of '03, does that sound about

Honor. This is a fact witness, not a legal

MR. LAMPKE: Objection, again, Your

10 (Pages 34 to 37)

23

24

step up here if I --

Page 38 Page 40 1 or solved the puzzle, you received something 1 value? or the machine indicated that you would 2 Of prizes, yes. I don't know what 2 A. 3 receive something? 3 the value of the prizes are per ticket per how 4 Α. It took \$.60 away from me or \$.70 4 much money I put in, so I can't --5 away from me or -- if you bet \$1.00 and you 5 If you put \$10.00 in, do you ever Q. get back \$.40, all right, you lose \$.60. You 6 think you'd get \$10.00 worth of prize value 6 7 bet \$1.00 you get back \$.70, you lose \$.30. 7 back? 8 On skill-based amusement machines --8 A. Like I said, I do not know the value 9 have you played other skill-based amusement 9 of the prizes. 10 machines? Do you know what -- withdraw the 10 Q. No, I'm just asking you, as you've 11 auestion. 11 played it. 12 12 A. Do you know what a skill-based I can't determine the value of the 13 amusement machine is? 13 prize. I'm familiar with what --14 A. 14 Q. Okay. Do you know what the requirements are for a skill-based game; do 15 Q. Skee-Ball? 15 Yeah, Skee-Ball, pinball. you know how to comply with a skill-based 16 Α. 16 All right. With pinball, you put 17 17 game? O. \$1.00 in, you play the game, you get nothing 18 18 A. No, not exactly. 19 back? 19 Q. So you're a liquor agent and you're 20 20 to determine the difference between a Α. That's correct. 21 Q. You lost \$1.00, correct? 21 skill-based game and an illegal machine, slot 22 Α. I knew what I was getting. 22 machine? 23 What were you getting? 23 Q. Α. No, that's not correct. My 24 Α. Amusement. My personal amusement. 24 determination is to decide whether something Page 41 When you play Skee-Ball, you play is an illegal gambling device. 1 Q. 1 2 the ball, I guess, correct? 2 Q. Okay. If I told you that the difference between a legal and an illegal 3 Um-hmm. 3 Α. 4 Q. You try to get it in a large hole, 4 gambling device is, if something is 51 percent 5 small hole, the smallest hole? 5 chance, it's illegal, and 49 percent skill, 6 Um-hmm. versus 51 percent skill and 49 percent chance. A. That's the difference between a slot machine 7 When you correctly do something in 7 8 Skee-Ball, what do you get, tickets? 8 and a skill-based amusement machine. Do you 9 Yeah, usually, at most places, yes. 9 know that, or do you have no knowledge of A. And you can play Skee-Ball all night that? 10 0. 10 long and you get this bushel-basket full of A. 11 11 Yeah, I'm familiar with that. 12 tickets and you go up and you get a teddy 12 Q. All right. What percent skill is 13 bear? 13 this game? Is there any skill in this game? MR. LAMPKE: Objection, again, Your 14 Α. 14 Yes. 15 Honor. This witness is a fact witness, he 15 Q. You would never in Skee-Ball get the 16 amount back in prizes that you've paid for in 16 didn't do a diagnostic, we have an expert 17 money to play the game, would you? 17 coming in to testify as to just that very I don't know. I don't know the 18 18 issue. 19 19 value of the prizes. CHAIRMAN MCNAMARA: I think the 20 Have you ever played Skee-Ball? 20 value of his testimony would be minimal, but Q. 21 21 if he has an opinion, he can express it. Α. Yes. 22 Q. Have you ever won any prizes? 22 THE WITNESS: Do you want my

11 (Pages 38 to 41)

MR. GEARHISER: I'll withdraw the

23

24

opinion?

23

24

A.

Q.

I won tickets, like you said.

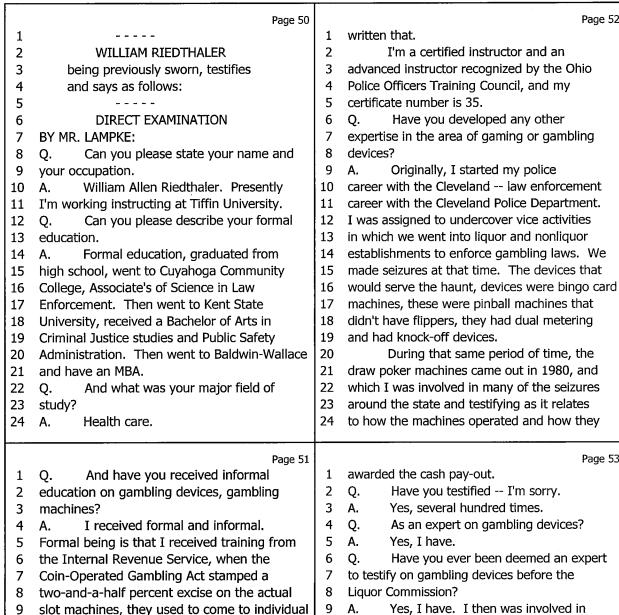

All right. Would those have any

	ase 3.19-cv-01470-JPVV Document 17		
	Page 42		Page 44
1	question.	1	A. I had to pick a square, a wild
2	BY MR. GEARHISER:	2	square, any square.
3	Q. Can cash be paid out on a	3	Q. And when you did that, what
4	skill-based amusement machine?	4	happened?
5	A. I haven't thought about this.	5	A. And then that's when it tells you
6	CHAIRMAN MCNAMARA: If you don't	6	whether you got correct answers or incorrect
7	know, just say you don't.	7	answers.
8	A. I don't know. It's possible, I	8	Q. And each and every time you did that
9	know.	9	you got correct answers?
10	Q. Does the machine you played involve	10	A. That's correct.
11	a task? Do you have to do something?	11	Q. And were given some value but
12	A. Yes.	12	something less than \$1.00, we know that?
13	Q. All right. What did you have to do?	13	A. Something less than my wager.
14	Besides putting money in?	14	Q. Correct, which was either \$.50 or
15	A. It plays a game similar to	15	\$1.00, I think you testified?
16	tic-tac-toe, I guess.	16	A. Yes.
17	Q. Okay. There's nine squares?	17	Q. All right. So would you say that
18	A. Yes.	18	you actively participated in that game to make
19	Q. In the six that you played, did you	19	it play? You had to touch the screen, you had
20	ever have an automatic winner; did the machine	20	to actively do something?
21	ever give you an automatic winner?	21	A. Yes.
22	A. I don't understand the question.	22	Q. You just can't put money in, walk
23	Q. All right. Did you get three in a	23	away, and money spit out of the machine?
24	row without having to do something on the	24	A. No.
	Page 43	١.	Page 45
1	machine?	1	Q. All right. And if you put money
2	A. I don't recall.	2	into the machine and pressed the play button
3	Q. Okay. Did you have to do something	3	and did nothing, do you know what would
4	to the machine to activate it? How did you	1 1	
		4	happen? Do you know if you would
5	get it to start?	5	automatically lose?
6	A. Put money in it.	5 6	automatically lose? A. No, I don't know.
6 7	A. Put money in it. Q. Okay. Then what did you do?	5 6 7	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time
6 7 8	<ul><li>A. Put money in it.</li><li>Q. Okay. Then what did you do?</li><li>A. And then I believe you push the</li></ul>	5 6 7 8	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?
6 7 8 9	<ul><li>A. Put money in it.</li><li>Q. Okay. Then what did you do?</li><li>A. And then I believe you push the button to start the wheels or start the timer</li></ul>	5 6 7 8 9	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.
6 7 8 9	<ul> <li>A. Put money in it.</li> <li>Q. Okay. Then what did you do?</li> <li>A. And then I believe you push the button to start the wheels or start the timer or whatever it is. 6 7 8 9 10 11	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the	5 6 7 8 9 10 11	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?
6 7 8 9 10 11 12	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen?	5 6 7 8 9 10 11 12	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.
6 7 8 9 10 11 12 13	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right.	5 6 7 8 9 10 11 12 13	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse
6 7 8 9 10 11 12 13	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a	5 6 7 8 9 10 11 12 13 14	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.
6 7 8 9 10 11 12 13 14 15	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board?	5 6 7 8 9 10 11 12 13 14 15	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.
6 7 8 9 10 11 12 13 14 15 16	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I	5 6 7 8 9 10 11 12 13 14 15 16	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the
6 7 8 9 10 11 12 13 14 15 16 17	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot	5 6 7 8 9 10 11 12 13 14 15 16 17	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when
6 7 8 9 10 11 12 13 14 15 16 17 18	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board.	5 6 7 8 9 10 11 12 13 14 15 16 17 18	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something
6 7 8 9 10 11 12 13 14 15 16 17 18 19	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board. Q. Okay. Comes up with nine symbols?	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something else on it, sometimes you picked the incorrect
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board. Q. Okay. Comes up with nine symbols? A. Yes, that's correct.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something else on it, sometimes you picked the incorrect square?
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board. Q. Okay. Comes up with nine symbols? A. Yes, that's correct. Q. And then you had to do something; is	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something else on it, sometimes you picked the incorrect square?  A. Yes.
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board. Q. Okay. Comes up with nine symbols? A. Yes, that's correct. Q. And then you had to do something; is that correct?	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something else on it, sometimes you picked the incorrect square?  A. Yes.  Q. Okay. So do you believe you
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board. Q. Okay. Comes up with nine symbols? A. Yes, that's correct. Q. And then you had to do something; is that correct? A. Yes.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something else on it, sometimes you picked the incorrect square?  A. Yes.  Q. Okay. So do you believe you controlled, you yourself, you as a player
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Put money in it. Q. Okay. Then what did you do? A. And then I believe you push the button to start the wheels or start the timer or whatever it is. It's got a timer on it. Q. But a picture comes up on the screen? A. Right. Q. And what's the picture, a tic-tac-toe board? A. Well, it could be that. Or what I thought it was was an electronic video slot machine board. Q. Okay. Comes up with nine symbols? A. Yes, that's correct. Q. And then you had to do something; is that correct?	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	automatically lose?  A. No, I don't know.  Q. Okay. You said you won each time you played?  A. Yes.  Q. This time; but other times when you've played it, apparently you have lost?  A. I got the wrong answer.  Q. Okay, that's what I'm saying, excuse me.  A. Incorrect answer.  Q. Okay. So sometimes you picked the correct location and at a later date when you've tested this machine or done something else on it, sometimes you picked the incorrect square?  A. Yes.  Q. Okay. So do you believe you

LAMPKE: At this time, I would move that Exhibit C into evidence and offer 4 THE WITNESS: Maybe that's a little 4 5 Mr. Riedthaler as an expert on gambling 5 easier on everybody. 6 The machine does not operate without 6 devices. A. 7 CHAIRMAN MCNAMARA: Do you care to 7 the insertion of money, so the first requirement is that you have to put money into 8 voir dire him? 8 the machine. There's a dollar bill insert 9 MR. GEARHISER: I do not, 9 10 10 that accepts -- that would accept from one, Commissioners. two, five, ten, twenty, and up to fifty CHAIRMAN MCNAMARA: All right. You 11 11 dollars at one time, or a single dollar bill. 12 12 may proceed. BY MR. LAMPKE: 13 We're going to put one dollar into the 13 14 Are you familiar with the machine 14 machine. Q. 15 called Tic-Tac-Fruit? 15 What you'll notice is that when I put the money in the machine, it recorded one Yes, I am. 16 16 Α. dollar in the points area. How so? 17 17 Q. 18 Α. There are four different versions. 18 Inside the machine there are two 19 types of metering systems: One is an 19 I've looked the at all four versions, three of which the State has seized. And the fourth electronic, that I'm going to be bringing up 20 20 21 one I looked at was involved when another 21 shortly. The second one, this mechanical 22 police department had the device. 22 metering system that records the money that Have you conducted an examination of 23 goes into the machine, there are two separate 23 Q. 24 the Tic-Tac machine at issue here, 24 meters, and one that records the money that is Page 57 Page 55 Tic-Tac-Fruit? taken out of the machine, or paid out of the 1 1 2 A. Yes, I have. 2 machine. 3 3 Q. Is that machine identified to your If you look at the bottom, there are right as being in the room? different amounts that I can play at one time, 4 5 Α. There were actually -- it is one of 5 or wager: \$.50, \$1.00, \$2.00, and \$4.00. At 6 the machines, correct. 6 present I only have \$1.00 in the machine, or I 7 7 can either play \$.50 or \$1.00 into the Did you generate a report based on your review of that machine? machine. 8 8 9 A. Yes, I did. 9 There is a bonus value. There's a 10 Handing you State's Exhibit D -- or 10 spinner locating the bonus value, has Department's Exhibit D in front of you; can \$2,647.56 assigned to it. The spinner value 11 11 12 you identify this document? 12 has 12. 13

- 13 A copy for each of the
- 14 Commissioners.
- Yes. This is a copy of that report. 15 A.
- Can you please describe your 16 Q.
- analysis of that machine? 17
- If I could, it may be easier if I 18
- 19 could walk over to the machine, if that's not
- 20 objectionable?
- 21 Q. I might have to hold the microphone
- 22 for you.
- 23 A. Can I take this microphone?
- 24 COMMISSIONER COLONNA: You can take

Based on how much you wager, for example, if we were to wager \$.50, this value changes in direct proportion to the amount you 16 wager. So the more you wager, the higher dollar amount you wager, the more you could win, or you've increased the amount you could win.

- 20 Q. What is the bonus value when you
- 21 wager \$.50?
- 22 \$330.94. Conversely, if we were to Α.
- 23 play \$4.00, it would be \$2,647.56 I would be
- 24 playing for, if I had the one combination that

19

20

1 would award that.

2 There is a replay award schedule 3 inside the machine, and it tells you the 4 value. If I were to get three titanium bars, 5 I would receive that award. If I were to 6 receive three spinners, I would receive an 7 unknown dollar amount, and that's based on how 8 much money is taken from the play and put into 9 the spinner area as well as the flip area. 10 Then there are defined -- and we're going to call it a replay award schedule; they refer to 11

12 it as a winning prize schedule. 13 If you were to get three bells, you 14 would receive \$20.00; three plums, \$4.00; 15 three, we're going to call them oranges, \$1.20; three lemons, \$.80; three cherries, 16 \$.40. That's on a \$4.00 bet. 17

18 So on a \$4.00 bet, the bottom four 19 redemption values, you would not make --

20 there's no opportunity to obtain higher than

21 the amount you wagered?

1

2

3

4

12

13

14

15

16

17

18

22 A. That's correct. That's correct, 23

unless the capabilities -- and we're going to 24 talk about the number of lines you receive,

and I'm going to be covering that in a little bit, but I just wanted to let you see how the reward play schedule works.

Then what I'm going to do is change this to \$.50 and then go back to that same schedule. You will see that the winning prize, the largest winning prize that you can obtain is \$330.94, all the way down to \$.05 if you were to get the three cherries. So you have different values based on the amount of money that you wager as well as the combinations that could appear on the screen.

Now what I'm going to do is sort of close this off, and then electronically I'm going to throw a switch in the back of the machine. That's going to allow us to get into the setup mode of the machine and how it's set

19 What we would start with would be 20 the stats menu. And what's referred to as 21 finite stats. Press this button, you'll see 22 that there are two blocks on the far 23 right-hand area. One is referred to as a line 24 combo finite table. The second is what's

called a win tier finite table.

The machine, when you put your machine in, you decide what you want to wager. When you place that wager, you start the game. It selects how many lines it's going to allow you to have as a winner. When you play this game, there is a winner capability every time that you play. There's a possibility.

So let's just say you put in the money, it selects one line. It then goes to the second area and then says how much is that line worth. And this is totally done randomly by the machine; the player has no input in that selection.

If you were to picture this bottom block as -- if you were to have break-open tickets, on the top of that break-open ticket box is usually what's referred to as a cut card. That cut card says there's going to be so many dollar winners, so many that has this value, so many that has this value, so many that has this value, going down until there are no -- and usually what it says on the break-open ticket, there's so many nonwinners

Page 61

Page 60

in the box.

In this case, every one of these is a winner, but it is randomly selected, once this winds. So if it selected four lines, it would randomly select four within this. It cannot exceed the number.

Okay, so in this case, there are 60,000 separate individual winning combinations. The actual number of plays is determined by the actual selection process of the individual lines. So it would go in and it would say I'm going to let you have a \$1.00 winner. And it would select that prize from down here. Or it could say I'm going to let you have three lines; in those three lines I'm going to let you have three cherry winners. That's the lowest prize value.

Again, it is selected by the machine. It makes that determination again, selection process.

21 Q. Before we move on from that screen, 22 let's see if we can identify it in your

23 report. I'm going to refer to you page 7. 24

On page 7 of your report is the top block that

16 (Pages 58 to 61)

Page 62

1 you referred to; is that the line?

- 2 Yes, that's the line. And then Α.
- 3 below that is what's referred to the win tier
- 4 finite table. And it then picks those, and
- 5 normally it tells you the number that is played. In this case, there was 60,000 are in 6
- 7 available, but 40,800 have already been
- 8 played. So subtract one from the other,
- 9 that's how many are left.

10 MR. GEARHISER: You mean on your 11 exhibit, not on this machine.

12 THE WITNESS: Right.

13 MR. GEARHISER: Okay, okay.

14 BY MR. LAMPKE:

15 Q. Your exhibit came from this machine,

did it not? 16

17 This is -- what happened was, on Α.

18 this, the machines are set up in series, and

19 we do not have -- this is a slave, not the

20 master. This is from the master that would

carry the records. Okay. 21

22 What you could do on several of

23 these machines is, sort of like computers, you 24

could string them together. These machines

1 Q. Have you ever been given access to

Page 64

Page 65

2 the source codes to describe that usage?

3 A. No, I have not.

4 Q. Okay. So without that information

from the owner of this machine, whether it's

the permit holder or somebody else, out of 6

7 60,000 possible winning combinations, by my

8 calculations and let me know if you agree with

9 me, 58,449 games you would not win more than

10 the amount of your wager?

11 A. If it was an individual choice.

12 Again, I don't know how many lines are

13 physically selected.

14 Q. Okay.

We had talked earlier about there 15 A.

are meters inside the machine that record how 16

17 much money is placed into the machine; they're

18 referred to as hard meters, and I pointed them

19 out to the Commission. They're inside and

20 they're black plastic and they have numbers on

21 them.

22 This is the electronic version, so

23 every dollar that is placed into the machine 24 is electronically recorded inside the machine

Page 63

can be strung together, and if you'd like, I 1

2 could turn the machine around.

3 Q. That's okay.

4 And you could see that there's a A.

5 plug-in so that you could allow them to run

6 them as one master and then the slave.

7 Out of 60,000 possible winning

8 combinations, how many opportunities are there

9 to win the grand prize?

10 A. One.

Q. How many times would you not win 11

12 more than the amount you wagered?

13 That would be around 80-something

14 percent.

15 Q. Over 80 percent?

Right. But again, you have to 16 A.

consider that's based on one line. You could 17

have multiple lines. That would be reduced 18

19 from there.

20 If you did not base it on multiple

lines, and I understand that is part of the 21

22 equation, do you have a manual to describe the

23 line usage?

24 A. No, I do not.

on the actual tables. It also records other 1

> 2 things such as how much money is in different

3 type of variations, amounts were placed into

4 the machine.

5 We're now in the setup, what they

refer to as the setup menu. Inside the setup 7 menu there is a button called game setup. The

8 game setup allows the owner or, let's say the

owner of the machine, to adjust the

10 percentages on the machine. For example, the

11 manufacturer sets this at a base rate. The

12 individual operator can then adjust that rate,

13 but not to exceed the amount set by the

14 manufacturer.

15

COMMISSIONER GARDNER: So --

16 THE WITNESS: Excuse me. Picture 17 again, yeah, I'm going to go backwards, it

might be a little easier. Yes? 18

19 COMMISSIONER GARDNER: Not to exceed

20 the minimum that the owner put in, or the

21 maximum?

22 THE WITNESS: In this one, the game

23 level was set at 95 percent.

COMMISSIONER GARDNER: 95 percent

17 (Pages 62 to 65)

24

Page 66 Page 68 clarification, 95 percent means that for every meaning what? 1 2 2 dollar you put in, you can win, over a period THE WITNESS: For every dollar put of time, average \$.95 for every dollar? 3 in into the machine, it pays out 95 percent, 3 \$.95, and \$.05 is retained for the operator or 4 THE WITNESS: Yeah. In this case, 4 5 there's no average. What happens is, this 5 owner of the machine. 6 machine --6 COMMISSIONER GARDNER: Okay. 7 COMMISSIONER GARDNER: That's what's 7 BY MR. LAMPKE: 8 And is that reflected in page 8 of 8 confusing me. Q. 9 THE WITNESS: Yeah. This machine 9 your report? has a cartridge inside it, and probably the 10 10 Α. Yes. easiest comparison to do is if you had a box 11 CHAIRMAN MCNAMARA: Can the operator 11 of break-open tickets, when you begin to sell 12 of the machine increase that 95 percent or 12 that first ticket you know exactly -- if I decrease the 95 percent? 13 13 14 sell all the tickets, I will receive X number THE WITNESS: Yes, he can. And he's 14 15 done -- there's adjustments and settings that, 15 of dollars, I will pay out so many dollars in this machine. That bottom area that I showed, in this case, you can see that there was an 16 16 where it actually determines what we call the adjustment of 2.48 percent, so that he raised 17 17 18 the total amount possible to 97.48. So that 18 prize award schedule inside the machine, it knows that every card is a winner. If I sell 19 is adjustable by the operator of the machine. 19 every game inside the cartridge, I'm assured CHAIRMAN MCNAMARA: It could be 20 20 21 that 95 percent will be paid out and 5 percent 21 reduced down the other way too? 22 will be retained in the machine. 22 THE WITNESS: I do not believe it can go below the 95 percent. They could set 23 So picture if you just take one of 23 that to zero and they would have to disable, I 24 those boxes of cards, it can't exceed that 24 1 believe, the spinner and the flipper, but I'm 1 because that's all the game -- that's all the not certain on that because I don't have an 2 games that are available to be played. Once 2 owner's manual or the actual book, but it 3 that cartridge is empty, then you have to load 3 4 cannot go below the 95 percent set by the 4 another cartridge. 5 manufacturer. 5 BY MR. LAMPKE: 6 For example, if this machine 6 BY MR. LAMPKE: O. 7 Have you reviewed multiple 7 contained a cartridge of 60,000 games per 8

- Tic-Tac-Fruit versions of these machines? 8
- 9 A. Yes.
- 10 And in your review of those
- machines, has the game level setup been 11
- different on each or every machine? 12
- 13 Yes. Unless they're in the same
- establishment. Usually at the same 14
- establishment, they're usually set at the same 15
- rate. However, I've been in establishments 16
- where there will be five machines and two are 17
- 18 set different than the three.
- 19 And what is the range that you have
- 20 seen, although that's not the range that it
- 21 can be?
- Up to 95 -- 98 percent. From 95 to 22 A.
- 23 98 percent.
- 24 COMMISSIONER GARDNER: Just for my

- cartridge and it took -- and this isn't the
- 9 actual value, but it took \$1,000.00 to play
- 10 all of those games, what would the net result
- to the player be if the player successfully 11
- 12 completed the task?
- 13 Α. Okay, yeah, it would be 95 percent.
- So 95 percent would be paid for that 14
- \$1,000.00, \$950.00 would be returned to the 15
- player, and the \$50.00 would be retained by 16
- 17 the operator owner of the machine. These are
- 18 set at 95 percent.
- 19 Q. Does the player have any opportunity
- 20 to beat the machine, to get greater than that
- 21 percentage?
- 22 Α.
- 23 Based on any application of skill? Q.
- 24 Α. No. No, he can't exceed that,

18 (Pages 66 to 69)

Page 70 1 because that's the maximum level the machine 1 Q. 2 2 was set at. So you can't exceed that. 3 3 Now, there is a possibility, if 4 there was a carryover in a jackpot, that would 4 A. be the exception. But in the next cartridge, 5 5 6 it would probably adjust itself out. 6 7 Would it adjust itself out through 7 8 8 the bonus rounds as well? Q. 9 9 Right. If there was a carryover. machine? Α. 10 Q. And the bonus rounds are described 10 Α. as what? 11 11 Q. 12 Α. Well, it's based on the symbols that 12 round? appear. Some of them you do not have access 13 13 A. to and require a certain amount of paying into 14 14 the machine to set that, for that feature to 15 15 become available. 16 16 17 Q. What are the bonus round features? 17 18 Α. Well, there's actually two. There's

Is there any skill involved to a player once he obtains the bonus round to get extra money? In actually pressing or making a

Page 72

Page 73

decision, no. No. Same thing as -- it's already decided what it's going to pay you out. It knows what it's going to pay you out. So it's a decision made by the

The machine makes that decision. Can you describe the other bonus

Yeah. The other one is what's referred to as the spinner. I've only had the

spinner happen once to me during about 40 hours of play, but a wheel comes up, and we

can put this in a demonstration mode in a

18 little bit. But essentially there's a --

picture a pie with different -- the same size 19

20 slices. A little ball goes around. When you 21 press the screen, the ball stops.

22 Again, this has really no control,

23 because the machine knows what it's going to 24 pay out.

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

Page 71

actual, what I referred to as the replay award 1 schedule. The values of these correspondingly 2 3 go up as you go up this column. This is the 4 column on the left, the far left-hand side. 5 So you'll see that cherries have the least 6 value, the lemons have the next value, then to 7 oranges, plums, bells, then what's referred to as the flip, the spinner, and then the 8 9 titanium bars, the one that's the jackpot. 10 So when you have this, that's sort 11

what's referred to -- I'm going to switch in

Are you finished with this mode?

Okay. We had went through the

back to the regular mode.

Yes.

Okay.

19

20

21

22 A.

23

24

Q.

Q.

of to assist the player in the decision-making 12 process. If you were to have three flips in a row, you would then switch to the flip mode. 13 And you would then play a game where you press 14 15 certain portions of the screen. In reality, the machine already knows what it's going to 16 17 pay out, and that's the value of the flipper

or the value of the spinner, set by how much 18 19 money is pulled from each play of the machine.

20 So how much skill is involved from

21 the player in obtaining the additional bonus money? 22

23 Well, it's actually available to him

24 once he selects that combination. 1 Q. Can a player skillfully stop the

2 ball on a number that it wants to stop it on?

3 Close, but it really wouldn't make

4 any difference, because it already knows what

5 it's going to pay out. It's already

determined by the numbers what it's going to 6 7 pay out.

COMMISSIONER GARDNER: If you played that thing for 60,000 combinations, if you played that 60,000 times, would you be guaranteed to get the titanium bars?

THE WITNESS: If you completed the series, correct. And that's why it's a cartridge that has a, what we refer to as a finite number of wins. It has a defined number that it's going to pay out.

COMMISSIONER GARDNER: I guess that's the part I need the clarification on.

THE WITNESS: Sure.

COMMISSIONER GARDNER: If, for instance, that combination that's up there right now, is that one combination out of 60,000?

THE WITNESS: Yes. If it was the

19 (Pages 70 to 73)

Page 74 Page 76 1 titanium bars, correct. If you refer to the 1 other \$500.00 winner in there. 2 chart on page 7, and what I could do is, 2 THE WITNESS: That's correct. 3 you'll see that there is one chance out of 3 COMMISSIONER GARDNER: That's the 4 those 60,000 that the titanium bars would be 4 same, you can equate that to this? 5 completed. And if you would go down, the next 5 THE WITNESS: Right, but the player 6 one would be spinner, the next one would be 6 would not know that. 7 flip, the next one would be bells, plums, as 7 COMMISSIONER GARDNER: That's what 8 it relates to -- and it tells you the number 8 -- okay. But in the pull tabs, at least the 9 of possible winners there would be on that. 9 person that's selling the pull tabs, if he's 10 BY MR. LAMPKE: 10 standing in front of that person when they're 11 In answer to Senator Gardner's pulling the tabs, who know that that \$500.00 Q. 11 question, is there only one screen, one game 12 12 winner, because that would dissuade other 13 board out of 60,000 combinations that you can people from playing that particular pull tab 13 win the titanium round? 14 14 box. THE WITNESS: That's correct. 15 A. Yes. 15 16 Q. And is it possible to win the 16 COMMISSIONER GARDNER: That's what 17 titanium round when it does appear? 17 I'm trying to get to. Thank you. 18 18 THE WITNESS: Okay, Okay, what I'll 19 COMMISSIONER GARDNER: Can you win 19 do is, I put \$1.00 in the machine. We're 20 it twice in 60,000? 20 going to be playing for \$.50. 21 THE WITNESS: No. 21 BY MR. LAMPKE: 22 COMMISSIONER GARDNER: So the 22 Q. Wait a second, before we got into 23 cartridge -- and that's the part I'm really questions from the Commission, I wanted to 23 24 trying to understand. clarify that on the spinner round, like the Page 77 Page 75 1 THE WITNESS: Right. flipper round, the flip round, the machine 1 2 COMMISSIONER GARDNER: It's like if 2 controls what that bonus amount will be 3 there's 60,000 little bits in there, and you 3 without any application of skill from the 4 get that combination, that bit is now gone off 4 player? 5 that cartridge? 5 A. The application of skill would be to 6 6 THE WITNESS: Right. If you look at complete that series, then the machine already 7 the second column on page 7, the bottom one, 7 knows what it's going to pay out. The second 8 you'll see is that on tier one there's one 8 half is really not involved because the 9 involved, it's already been played. So 100 9 machine pays out whatever it's going to pay 10 percent of those have been played out. 10 out. And how that's filled is that it takes a There's only one inside the machine. Again, 11 percentage of the individual plays or losses, 11 12 that's already been played. If there was a 12 that money is transferred. 13 13

zero there, it would still be available for 14 play. 15 BY MR. LAMPKE: 16 Q. And this is not available to the 17 person that's playing? 18 It would be available to the 19 operator or owner of the machine. 20 COMMISSIONER GARDNER: So like the pull tabs, if you know that in a box of pull 21

tabs there is a \$100.00 winner or \$500.00

winner, and once somebody has pulled that

\$500.00, you know for sure that there's no

22

23

Q. The player plays a round. You're talking about a player completing a game board? A. A game board, right. And then once that game board is completed for a spinner line series, it would go to a separate screen? A. Yeah, to goes to a separate -- yeah, it goes the whole thing, and in the case of a

flip, it looks like a little vault. In the

case of a spinner, the entire screen fills up

with the pie-shaped fair, and I can show you

20 (Pages 74 to 77)

14

15

16

17

18

19

20

21

22

23

24

Page 78

- 1 that when we get to the demonstration mode,
- 2 because I'm not that lucky.
- Okay. In that separate screen, does 3
- 4 the player employ any skill in obtaining that
- 5 spinner bonus?
- No. Once that decision is made, it 6
- already knows how much it is. The only thing 7
- 8 that the player has to do is physically press
- the screen the number of times till --9
- Q. To activate it? 10
- To activate it, to get your money. 11 Α.
- So the outcome of playing the 12 Q.
- spinner round is determined by the machine 13
- without any skill from the player? 14
- 15 A. It's already decided, right.
- 16 Q. Okay.
- 17 It's predetermined. Α.
- 18 Q. Okay. I wanted to clarify that
- before you moved on. Go ahead. 19
- 20 Okay. What I'm going to first do Α.
- is, when you start to play, there is a time 21
- 22 setting set by the machine, by the operator of
- 23 the machine. I'm not going to play the
- 24 machine, and I'm going to have it go through

Page 80

- 1 problem, if he needs to -- because I think 2 everybody wants to see how it plays.
- 3 MR. LAMPKE: Is that the master?
- 4 MR. GEARHISER: It's not the master,
- but it's a single play that does exactly the same. It's the same version, everything is 6
- 7 exactly the same. We knew what version was
- here because, luckily, the copy that you 8
- 9 showed us, it's not the same version.
- 10 COMMISSIONER GARDNER: Is there a way to tell from looking at the outside of 11
- them that one is a slave and one is a master? 12
- THE WITNESS: The only thing that 13 14 you'd see is a wire going from the one machine
- 15 to the other machine.
- MR. GEARHISER: If you knew 16 machines, you'd know it. But, like I'm sure 17
- 18 the agent who brought it here, he wouldn't
- have known the difference. 19
- 20 MR. LAMPKE: Why don't we go ahead 21 and turn yours on and as we continue on with
- 22 our testimony, maybe we can get a sample play
- 23 out of your machine.
- 24 BY MR. LAMPKE:

Page 79

- and cycle. So when I press my \$.50, I would Q. 1
- then press play. What would happen would be, 2
- 3 these images --

1

2

- 4 MR. GEARHISER: You want to use
- 5 ours? If your machine is not working 6 properly, we can get ours up and operating.
- 7 MR. LAMPKE: But you were talking
- 8 this is a slave machine?
- 9 THE WITNESS: See, what happens is,
- 10 this is a slave; it needs the master to pull
- the games. 11
- 12 MR. LAMPKE: So the cartridge is not
- 13 there on this one; is that what you're saying?
- THE WITNESS: There's no cart --14 it's the availability of a cartridge, but it 15
- 16 can't access what it needs from the other
- 17 machine because the master isn't here. This
- 18 is the slave.
- 19 MR. LAMPKE: I apologize to the
- 20 Commissioners for that.
- 21 COMMISSIONER GARDNER: I understand
- 22 the purpose. I understand the master-slave 23 concept.
- 24 MR. GEARHISER: But I don't have any

Page 81 Bill, is there any other description

- you can do while we're waiting for that
- 3 machine to go through its cycle?
- 4 Okay. What happens is that this is Α.
- 5 the version, it's tic-tac-toe and it's fruit.
- Down at the bottom there are specific codings
- 7 that will identify the individual cartridge
- inside the machine. Again, based on the model 8
- 9 of the machine, they can have X number of
- 10 cartridges. Each one has a different 11 capability to support separate machines.
- 12 Now, what happens when you place
- your wager, you would place either \$.50, 13
- \$1.00, \$2.00, or \$4.00. You would then hit 14
- the play button. These images would move, and 15 there would be -- you would make a decision 16
- where you want to place a wild card. And it's 17
- 18 probably easier if I'd wait for the machine in
- 19 the meantime.
- 20 Bill, if you're finished with your Q.
  - description without demonstrating a play, why
- 22 don't I go through some additional questions
- 23 here.

21

24 A. Sure.

21 (Pages 78 to 81)

Page 82

- Q. Is the game designed to produce a 1
- 2 quaranteed income?
- 3 Yes, the machine is. Α.
- How so? 4 Q.
- 5 It's set by the actual table that we A.
- looked at and the percentages. So it knows 6
- 7 that all the prizes are paid out. In fact, it
- 8 pays whatever the settings are. So if it's
- set at 95 percent, it pays out 95 percent, 9
- retains 5 percent for the operator/owner of 10
- 11 the machine.
- Can the permit holder or owner of 12 Q.
- 13 the machine adjust the guaranteed return
- 14 percentage?
- The individual player cannot. The 15 Α.
- owner of the machine would have the capability 16
- 17 of adjusting the spinner rate and all the
- rates within the machine, but not the 18
- manufacturer's set rate. 19
- 20 How does that control the outcome of Q.
- 21 a play of the machine?
- What it would do is that it would 22
- remove money from one area and transfer it to 23
- another. It would allow the spinner to have 24

Page 84

Page 85

- select what the prize is going to be for those
- line combinations randomly. So it would make 2
- 3 that decision.
- 4 Then at the same time it would
- 5 transfer a certain amount of money to the flip
- and the spinner area. Now, that could be 6
- 7 based on the 95 percent or it could be
- increased by the individual operator to bring 8
  - people in to play.
- The player then would then play the 10
- game. And then that would be skill. 11
- 12 Q. Completing the task of --
- Completing the task of deciding what 13 Α.
- 14 the lines are.
- Okay. When a player activates the 15 Q.
- machine, they do that by hitting the play 16
- 17 button?

9

- 18 A. Yes.
- 19 When that occurs, does the computer Q.
- 20 then determine what game board the player will
- 21 play?
- 22 Yes. It then picks the number of A.
- 23 lines of the winner and then the actual prize
- 24 to be awarded.

Page 83

- more of a value. It would allow the flip to 1
- 2 have a higher value. Correspondingly, on the
- manufacturer's or the operator's side, it 3
- 4 would lessen some of their profits. But it
- 5 would pay out more to encourage people to play
- 6 more.
- In reviewing your description of the 7 Q.
- machine, how many tasks or identified 8
- 9 characteristics of the machine would you say
- 10 is based on skill?
- 11 Α. Okay.
- 12 Q. Of the player.
- Yeah. When you talk about the task, 13
- task is like the entire process, but we'll go 14
- 15 through the different components of it.
- The player would put the money in, 16
- and there's some ability to put the dollar in 17
- 18 that involves some type of skill.
- You would then put the -- you would 19
- then make a selection of how much you wish to 20
- 21 wager.
- 22 You would then press the play
- 23 button. The play button would then go select
  - the number of lines randomly. It would then

- 1 Q. Can a player skillfully choose what
- game board he or she will play? 2
- No. And this is where this departs 3
- 4 from a normal skill-based game. If you walk
- to a pinball machine, you would put money into 5
- the machine and begin to play the machine. 6
- 7 It's not a different service; it's the same
- for everybody that plays. It's the same award 8
- 9 schedule.

10 So let's say it was a pinball

11 machine that you needed 10,000 points to win a

free game. It would be the same for you, it 12

would be the same for anybody that would play 13

14

that machine. They would have to have that

15 amount of skill to receive a free replay on

the machine. 16

17 And this one, the machine, you play

18 a game, you complete a task, we're talking about the task being completing, the number of 19

20 lines. It has already decided how much it's

- 21 going to pay you if you successfully complete
- 22 that. So one person could play it, get \$.20.
- 23 Another person could play and complete one
- 24 line and get \$2,800.00. And it's just by what

22 (Pages 82 to 85)

Page 86 Page 88 1 random board comes up. the play button. And the wheels turn. And 1 2 So let's just say, what 2 they stop. 3 differentiates a little bit of this is that 3 Your task is to complete the game 4 when we walk up to a pinball machine, you know 4 and obtain the highest dollar amount. So in 5 what you're going to win if you complete the 5 this case, for my \$.50 bet, by completing the 6 task. In this case, it does tell you what the 6 series, I had made the correct choice and I 7 options are, the value of those, but in fact 7 won \$.25 for my \$.50. 8 until you play the game and put your money in, 8 CHAIRMAN MCNAMARA: To make a 9 what you get back is determined by the 9 correct choice, what did you --10 machine. It's chance. 10 THE WITNESS: Okay, if I were to, 11 So let's just say you knew that the 11 let's say, press this one, I would have lost next one up was \$.20, would be a \$.20 winner. 12 12 out on this combination, so I could make an Would you walk up and put \$1.00 in the machine 13 13 incorrect choice. if you know you could win \$.20? And the 14 14 MR. GEARHISER: Yeah, you're going 15 answer is no. 15 to need more than fifty cents to show all the 16 MR. GEARHISER: Objection. 16 games. 17 You personally wouldn't do that? Q. 17 BY MR. LAMPKE: 18 A. I personally wouldn't do it. On this game board, how many lines, 18 Q. 19 CHAIRMAN MCNAMARA: What reason? how many winning lines were there? 19 20 MR. GEARHISER: Well, the whole 20 Α. One, two, three. 21 point of this is, in most skill-based 21 Q. And the correct placement to obtain 22 amusement machines, in virtually all 22 all of the lines available to this game board, 23 skill-based amusement machines, you never get 23 where did you place the wild symbol? any more than you put in. Now, there may be 24 24 In the center. We're going to play Α. Page 87 Page 89 1 objection, I'll withdraw the objection, but 1 a couple. 2 I'll go into that on cross-examination. 2 COMMISSIONER GARDNER: Is there 3 BY MR. LAMPKE: 3 always a wild symbol? 4 Q. Before we get to your ultimate 4 THE WITNESS: Yes. 5 conclusions, could you please demonstrate one 5 COMMISSIONER GARDNER: Okay. COMMISSIONER COLONNA: What did you 6 game? 6 7 Α. 7 put in there, Kurt? Sure. 8 Q. And as you're walking over to the 8 MR. GEARHISER: We put a 20 in, so machine, how much time does a player have to 9 9 he could play enough. 10 complete the task? 10 COMMISSIONER COLONNA: Let me know 11 A. It's individually set by the 11 next time you play, I'll give you the money. 12 (Laughter.) 12 operator. 13 Okay. And generally, what is the --13 BY MR. LAMPKE: Q. We're going to --Again, now that we have money, we 14 Α. 14 A. We'll find out on this machine? could then play, let's say, this game for 15 Q. 15 16 Α. We'll find out. 16 \$4.00, or we could play it for \$2.00 or \$1.00. 17 Again, we put the money in, it 17 We would make a decision how much we would

23 (Pages 86 to 89)

18

19

20

21

22

23

24

press play.

like to wager in this machine.

money, see, he's playing for \$4.00.

So let's play for \$4.00. We would

MR. GEARHISER: Of course, with my

And in this case, what would happen,

we could make again the correct choices in the

registers the type of machine. Because we

only put \$1.00, makes the \$.50 -- I'm sorry.

available to play the \$.50 game or the \$1.00

game. We probably want to play two, so we'll

You then wager \$.50. You then press

Because we put \$1.00 in, it only makes it

18 19

20

21

22

23

24

play \$.50.

Page 90

- center, and for the \$4.00, we won \$3.20. So 1
- 2 the machine has \$.80.
- 3 Q. And how many line winners were
- there on this game board? 4
- One, two, three, four. So when it 5
- 6 picked this game, it went into it, it said I'm
- 7 going to make a four-line winner. And then
- 8 inside it, it's going to pick out I want one
- to be lemons -- or two to be lemons, one to be 9
- oranges, and one to be cherries. It 10
- 11 electronically determined that. It randomly
- 12 selected it.
- So you received a game board to play 13 Q.
- that had the maximum number of lines of 14
- 15 winning combinations?
- 16 Α. Right.
- 17 Q. And you still received less than the
- amount you wagered? 18
- Yes. 19 Α.
- 20 Q. And what is the time that you have
- 21 to complete that task?
- Okay, we're going to do that. We're 22
- 23 going to play \$.50 now. And if I start the
- 24 play, you'll see in this area it will tell you

- Page 92 guessed correctly, I would have received
- 2 \$1.60. So even if I guessed correctly, I
- 3 would have lost \$2.60.
- 4 BY MR. LAMPKE:
- 5 Is the task to place the bonus icon Q.
- in a way that it will create three lines --6
- It will create the maximum amount of 7 8 wins for you.
- 9 MR. GEARHISER: The wild icon, not 10 the bonus icon.
- 11 THE WITNESS: The wild icon, right.
- 12 BY MR. LAMPKE:
- 13 So it would create three identical Q.
- symbols within a line? 14
- 15 Α. That's correct. And what you want
- to do is pick the correct choice to maximize 16
- that choice. 17
- 18 And the wild symbol will become Q.
- 19 whatever fruit, in this case, that will make
- it a winning combination? 20
- That's correct. It's sort of, if 21 Α.
- you picture, it's a wild card, and so you 22
- could put that wild card on the board to 23
- complete it for the highest possible total, 24

Page 91

- that the timer, and it will say that you have 1
- 2 ten seconds, nine seconds, eight seconds,
- 3 seven, six, five, four, three, two, one, and 4
- you lost.
- 5 And then if you notice, the amount 6 of a loss is added for another player. The
- 7 money doesn't go to the profit of the house,
- they don't keep the excess; it goes back into 8
- 9 the machine.
- 10 Okay. And again, it increases this
- amount in the area of the bonus value area. 11
- We'll play it again. We'll play it 12
- at \$4.00. And I'm going to make a wrong 13
- choice. Okay. Let's just say that I know 14
- 15 that this is the correct choice, so let's say
- 16 I put this one.
- 17 COMMISSIONER COLONNA: How do you
- 18 know it's the correct choice?
- 19 THE WITNESS: Because I'm trying to 20 complete a tic-tac-toe.
- 21 COMMISSIONER COLONNA: Okay. Go
- 22 ahead.
- THE WITNESS: So in this case, there 23
- were no wins. For my \$4.00 wager, if I

- 1 and that would be the skill portion of the 2 game.
- 3 COMMISSIONER COLONNA: You got two
- cherries on there. What if you pick the one 5
- in the middle there, what would happen then? THE WITNESS: Okay. If we were to 6
- 7 pick --
- 8 COMMISSIONER COLONNA: No, no, the
- 9 one by the cherries. 10 THE WITNESS: Here?
  - COMMISSIONER COLONNA: Yeah.
- 11 12 THE WITNESS: It would actually pay
- 13 off this way and pay off this way, and that
- would be the \$1.60 win for your \$4.00 wager. 14
- COMMISSIONER COLONNA: Or you could 15 16 pick the wild card, right?
- 17 THE WITNESS: No, no, no. Let's
- 18 play one more time. COMMISSIONER COLONNA: Do you have a 19
- 20 choice?
- 21 BY MR. LAMPKE:
- 22 Is there any wild card on the screen Q.
- 23 when the --
- 24 Α. There's no wild until you press.

24 (Pages 90 to 93)

Page 93

Page 94 Page 96 COMMISSIONER COLONNA: No wild card CHAIRMAN MCNAMARA: But the skill is 1 1 2 2 there. really minimal. 3 3 THE WITNESS: Right. And then you THE WITNESS: In my opinion, yes. 4 would make your decision where I would like to 4 BY MR. LAMPKE: 5 place it. So what you try and do is, within 5 Q. Can you please take your seat and 6 the time period make that correct selection. 6 let's wrap this up and take a short break 7 7 If you don't, it tells you. In fact, for my then. 8 \$.50 bet, I didn't win because I didn't 8 How many hours have you spent 9 9 complete the task within the time frame, but evaluating and examining the Tic-Tac-Fruit machines? even if I completed the task for my \$.50 10 10 11 investment, I would receive \$.20. 11 A. Probably around 40 hours now. 12 COMMISSIONER GARDNER: That amount 12 Q. And how much of that time was spent playing the game versus analyzing it? 13 varies every time? 13 THE WITNESS: Every time. And 14 Probably, with me playing, it's 14 A. 15 that's randomly selected by the computer. 15 probably been about five hours; watching other BY MR. LAMPKE: people, I would probably add on about two or 16 16 three hours on top of that, watching other 17 Q. And ultimately you would lose \$.30? 17 18 Correct. 18 people play the machine. A. CHAIRMAN MCNAMARA: The selection of 19 Do you have an opinion, to a 19 Q. the right one to push, is that something that reasonable degree of gambling device 20 20 21 would take a Ph.D. or --? 21 certainty, if the Tic-Tac-Fruit machine is an 22 electronic video gambling device? 22 THE WITNESS: I'm not. What it is 23 23 is that, I would assume that there's a very A. Yes, I do. 24 short learning curve. At least the people 24 Q. What is your opinion? Page 95 Page 97 that I have watched play this machine, within 1 A. Yes, it is. What happens on the 1 2 probably 20, 25 plays they usually understand 2 machine is that, it's the randomness -- if you the completion. Every now and then you do 3 look at the task, the task involves making the 3 4 make a mistake, but once you've played the 4 appropriate selection, and maybe I can go to a 5 5 game probably 20, 25 times, you have no different game. trouble completing the task every time. But 6 There's a carnival game that 6 7 what happens is, is that for your investment, 7 operates in the carnival midway and which is called a balloon dart, but it has a number 8 you usually receive less. 8

9 CHAIRMAN MCNAMARA: But it's not a 10

great deal of skill that's required to pick out the --

THE WITNESS: Right. A good way to 12 do this, if we could put it in this different 13 game format. Let's say we say complete the 14 series, and we say the number one, two, three, 15 16 and you have to pick out the next number; is 17 it four, five, or seven? You say, well, naturally it's four. And when you hit that, 18 19 you would receive \$2.00 -- you bet \$2.00 and 20 you receive \$.40. 21

So there is a skill involved to 22 complete the task, but the machine is going to tell you how much it's going to pay off, or 23

24 pay out.

11

24

9

10

11

12

13

14

19

20

21

22 A. It is based on chance.

23 Additionally, in your opinion, is Q.

skill or primarily based on chance?

someone other than the player controlling the

behind it. So you have to throw a dart at a balloon and you break it. Behind it there's a little tag that you cannot see that says small, medium, or large. If you break the balloon, you don't know what you win until he turns over the tag. And historically, in the state of Ohio, that's been found to be a gambling game. Q. Do you have an opinion, to a reasonable degree of gambling device certainty, if the outcome of playing this Tic-Tac-Fruit machine is primarily based on

25 (Pages 94 to 97)

Page 100 Page 98 outcome of the game? 1 1 Q. Okay. So that shouldn't be in here? 2 A. Yes. By the ability to set the 2 A. That shouldn't be in here. 3 3 percentage of wins, you can control the Okay. Did it get copied from Q. actual, the percentage of winning prizes. 4 another --5 Most of your skill-based machines, it's based 5 A. Yes. on the skill of a player. 6 6 Q. All right, all right. If you go up 7 In other words, if you get 100,000 7 a little higher in that same area -- excuse 8 points or I get 100,000 points on a pinball me, come down a little bit, it says the 8 machine, we get exactly the same prize. If I 9 Supreme Court of the State of Arkansas in the 9 10 don't accomplish 100,000 points, then I get 10 case of State versus --11 nothing. So it's the same for everybody. A. Yeah. 11 They don't say at one time you're a very Q. That's not --12 12 skillful player, we're only going to let you 13 Α. That's not this machine. But 13 get 90,000 points instead of a 100,000 points. 14 14 there's not a lot of case law on machines that 15 They say no, everybody can win at the rate 15 have been attempted to be tried as they would. skill-based. 16 16 17 And I think everybody has sort of 17 Q. I understand, but Tic-Tac-Fruit --18 been in an arcade where you watch a 18 Α. Is not --14-year-old kid play a machine for about a 19 19 Q. I want to make sure, because the way it was written in here, it sounds like 20 week and a half on his guarter. You walk in 20 they're similar games? 21 with your quarter and you last about six 21 22 seconds. So it's in that type of game mode. 22 A. Right. It's just like I did 23 MR. LAMPKE: Commissioners, with the 23 according to the Department of Agriculture, 24 admission of Department's Exhibit D, we would 24 they have nothing on -- other than the penny Page 99 Page 101 1 have no further questions. 1 fault machine relating to skill-based. 2 CHAIRMAN MCNAMARA: Cross-exam? 2 Okay, let's get to that too, because Q. 3 MR. GEARHISER: I would suggest we 3 you mentioned Ohio Department of Agriculture, and there's nothing in the statute today, in 4 take a five-minute break? 4 5 CHAIRMAN MCNAMARA: All right. 5 the statute that was passed in July of '03, 6 (A break was taken.) 6 that refers to the Department of Agriculture? 7 MR. GEARHISER: Thank you, 7 A. No. 8 8 Q. In fact, we have -- the Liquor Commissioners. 9 Control Commission has no rules, the 9 10 CROSS-EXAMINATION 10 Department of Public Safety has no rules, and 11 BY MR. GEARHISER: 11 as far as I know, no administrative agency has 12 I have looked at what's been marked 12 passed any rules to date, is that correct, on 13 as State's Exhibit D, and if you go back to 13 skill-based games? page 10? 14 A. On a state level? 14 15 15 Q. Α. Correct. 16 Q. It's the opinion, and you give some 16 A. Correct. history, fair rules, and some other stuff down 17 17 Q. So what we've got is the statute to look at? 18 there. 18 19 Α. Sure. 19 Α. Correct. 20 Q. All right. So what happened in the 20 Q. The last one there that says presence of double-up game on most of the 21 21 past with some court decisions, because at one 22 machines examined? 22 point pinball machines were illegal in the 23 Yeah. It's not relating to this 23 state of Ohio, pursuant to Westerhouse?

26 (Pages 98 to 101)

Pinball machines without flippers.

24 A.

24

machine.

	Page 102		Page 104
1	Q. Correct, were illegal?	1	that.
2	A. Were illegal. Pinball machines with	2	Q. Right.
3	flippers were legal.	3	A. But the base level is set in
4	Q. And so in your understanding, in	4	other words, I could leave this at zero and
5	July of '03, everything kind of changed in	5	keep this at 95 percent.
6	Ohio, we got a new statute?	6	Q. Right. Can you change that in here
7	A. Right.	7	now?
8	Q. All right, good. Now, you said	8	A. Yes.
9	something that I think I need to correct,	9	Q. Okay. You can't change the game
10	because again my knowledge of this machine is	10	level?
11	maybe not as good as yours. But can you come	11	A. No, I can't. That's set by the
12	back over to the machine you were looking at	12	manufacturer; that's the 95 percent.
13	and show us where you had that 95, there was a	13	Q. So what your testimony was was that
14	setup that showed 95 something?	14	you believe that this machine will always, no
15	A. Sure.	15	matter what, pay out to the players 95 percent
16	Q. Okay.	16	of what they put in?
17	A. What you have to do is throw it into	17	A. Ultimately, when all the dollars are
18	the setup mode. And the actual setup mode,	18	in, right. Because it's a finite cartridge.
19	and the game setup mode; is this the screen	19	Now, if that's not the case, then it's not a
20	you're referencing?	20	finite cartridge.
21	Q. The one that said yeah, we'll go	21	Q. Well, you can win each one of these
22	with that one first, then we'll go on to	22	if you're really good, each play?
23	something else. All right, you said it has a	23	A. Yes.
24	game level of 95 percent?	24	Q. And you can lose each one if you're
		<u> </u>	
	Page 103		Page 105
1	A. Right.	1	really bad?
2	Q. Okay. Now, I know you told us you	2	A. I don't think anybody is that bad.
3	didn't have a menu, so I'm assuming you just	3	Q. Okay, but you could?
4	made the guess or the educated guess or your	4	A. Yeah, I mean it's theoretically
5	study of it shows that this machine pays out	5	possible.
6	95 percent?	6	Q. If I play ten times in a row, I
7	A. Well, it starts off that; that's	7	could certainly lose ten times in a row?
8	from the manufacturer, having discussed it	8	A. Right.
9	with the inventor.	9	Q. What's the percentage payouts for
10	Q. All right. Well, I think the	10	the guy who loses every time?
11	inventor may say something different, but	11	A. Well, there would be no payout,
12	that's why I'm asking you.	12	because he wouldn't win.
13	A. Sure.	13	Q. Okay. So the really bad player
14	Q. You think the machine pays off 95	14	would never win?
15	percent no matter what?	15	A. The extremely bad player, but I
16	A. No. The additional to that is these	16	can't believe that anybody would be that bad.
17	adjustable levels.	17	Q. So if I played if there were
18	Q. Okay. Well, then if we add it	18	2,000 plays in a cartridge or 20,000 plays in

27 (Pages 102 to 105)

a cartridge and I lost them all, how much

I thought you told me and you told

the Commission and you told everybody here

that this machine paid out 95 percent no

money would I win?

None.

19

20

23

24

21 A.

22 Q.

19 together, and it looks like it's here, it's

21

22

23

20 set at 97.48, you would say the machine pays

off 97.48 percent for every dollar put in?

original testimony; I went through and I

Right. And I explained that in my

explained how those are additionally added to

	. <u></u>				
	Page 106		Page 108		
1	matter what?	1	incorrectly picked the spot?		
2	A. Right.	2	A. I don't understand the question.		
3	Q. But it doesn't pay out 95 percent?	3	Q. The first player wins, plays this		
4	A. Well, if I can explain.	4	game over here and he wins a lot of the plays?		
5	Q. Sure.	5	A. Right.		
6	A. Okay. What happens is, is that that	6	Q. Now I come along and I'm a bad		
7	money that is lost is transferred to the prize	7	player, and I lose the last 50 or the last 100		
8	area, so somebody is going to win that.	8	plays on the machine?		
9	Q. No, remember, I lost every play.	9	A. Um-hmm.		
10	A. Right. It still goes into the	10	Q. And, of course, the machine is		
11	thing, so the next person that plays after	11	randomly picking the games for us to solve?		
12	you're done has the possibility of winning	12	A. Sure.		
13	that.	13	Q. And I'm a bad player and I keep		
14	Q. Well, doesn't the cartridge end?	14	hitting the wrong location, or I look away and		
15	You told us that there was an end?	15	the game times out?		
16	A. Right, but it would then, it sets up	16	A. Sure.		
17	the next cartridge, and the carryover	17	Q. What's the set percentage that is		
18	transfers to the next cartridge.	18	going to go to the house?		
19	Q. Have you ever played this machine to	19	A. Well, it would be all the money		
20	the end?	20	that's not selected by the games being chosen.		
21	A. No, I have not.	21	Q. So when you said that it was always		
22	Q. Do you know that it automatically	22	95 percent, that's clearly not the case, is		
23	goes to another cartridge?	23	it?		
24	A. I understand it, from the	24	A. You're talking about such an

	Page 107	1	Page 109		
1 2	Q. Do you know?	1	improbability that probably not will occur,		
2	Q. Do you know? A. No.	2	improbability that probably not will occur, that somebody would lose every game.		
2 3	<ul><li>Q. Do you know?</li><li>A. No.</li><li>Q. So isn't it a fact the cartridge,</li></ul>	2	improbability that probably not will occur, that somebody would lose every game. Q. Let's say, could the bonus play come		
2 3 4	<ul><li>Q. Do you know?</li><li>A. No.</li><li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then</li></ul>	2 3 4	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up		
2 3 4 5	<ul><li>Q. Do you know?</li><li>A. No.</li><li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage</li></ul>	2 3 4 5	improbability that probably not will occur, that somebody would lose every game. Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?		
2 3 4 5 6	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> </ul>	2 3 4 5 6	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with		
2 3 4 5 6 7	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit</li> </ul>	2 3 4 5 6 7	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.		
2 3 4 5 6 7 8	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> </ul>	2 3 4 5 6 7 8	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last		
2 3 4 5 6 7 8 9	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge,</li> <li>when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just</li> </ul>	2 3 4 5 6 7 8 9	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?		
2 3 4 5 6 7 8 9	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to</li> </ul>	2 3 4 5 6 7 8 9	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.		
2 3 4 5 6 7 8 9 10	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you</li> </ul>	2 3 4 5 6 7 8 9 10	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last		
2 3 4 5 6 7 8 9 10 11 12	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this:</li> </ul>	2 3 4 5 6 7 8 9 10 11 12	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?		
2 3 4 5 6 7 8 9 10 11 12 13	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.		
2 3 4 5 6 7 8 9 10 11 12 13 14	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just		
2 3 4 5 6 7 8 9 10 11 12 13 14 15	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> <li>Q. We're not, but if we get halfway</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just disappear, correct?		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge,</li> <li>when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> <li>Q. We're not, but if we get halfway through this machine?</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Right.  Q. Then the bonus money would just		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> <li>Q. We're not, but if we get halfway through this machine?</li> <li>A. Right.</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just disappear, correct?  A. No, that's not correct. According to —		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> <li>Q. We're not, but if we get halfway through this machine?</li> <li>A. Right.</li> <li>Q. And I lost the last half, what would</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just disappear, correct?  A. No, that's not correct. According to  Q. Again, what do you know?		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> <li>Q. We're not, but if we get halfway through this machine?</li> <li>A. Right.</li> <li>Q. And I lost the last half, what would be the payoff to the player? Would it be 95</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just disappear, correct?  A. No, that's not correct. According to  Q. Again, what do you know?  A. Well, this is how I find things out,		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Now, let me ask you this: Let's just say I got halfway through?</li> <li>A. Um-hmm.</li> <li>Q. We're not, but if we get halfway through this machine?</li> <li>A. Right.</li> <li>Q. And I lost the last half, what would be the payoff to the player? Would it be 95 percent?</li> </ul>	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	improbability that probably not will occur, that somebody would lose every game.  Q. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just disappear, correct?  A. No, that's not correct. According to  Q. Again, what do you know?  A. Well, this is how I find things out, is I ask the manufacturer who		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	<ul> <li>Q. Do you know?</li> <li>A. No.</li> <li>Q. So isn't it a fact the cartridge, when it stops, it stops, and if you lost, then in fact, if I lost every play, the percentage payoff to me would be zero?</li> <li>A. Correct, so then it would be profit to the house then, at 100 percent.</li> <li>Q. I understand that, but I'm just saying, I'm just wondering to you to understand, but I think the information you gave us is wrong. Let's say, could the bonus play come up on the last play? Could the bonus come up on the last?  A. Yes, but there's a problem with that.  Q. Could the bonus come up on the last play?  A. It's possible.  Q. And if I lost a bonus on the last play?  A. Right.  Q. Then the bonus money would just disappear, correct?  A. No, that's not correct. According to  Q. Again, what do you know?  A. Well, this is how I find things out, is I ask the manufacturer who  Q. We'll bring the manufacturer in, but I'm asking what do you know.		

28 (Pages 106 to 109)

	Page 1	10
Llearned it.	Because there is no booklet	

- 2 published on this machine so that I can do
- 3 independent research from the machine.
- 4 Q. Okay. Is there something in the law
- 5 that says you're supposed to be given a
- 6 booklet or there's a requirement to be given a
- 7 booklet?

1

- 8 A. No.
- 9 Q. All right. Is there anything in the
- 10 law that says you have to pay out more money
- 11 than you wager each and every time?
- 12 A. No.
- 13 Q. Okay. Well, we have gone through
- 14 this whole testimony --
- 15 A. You want me to sit down?
- 16 Q. You can sit down, yes.
- 17 A. Okay.
- 18 Q. We've gone through this long
- 19 testimony about how, man, I put \$1.00 in and I
- 20 can only win \$.40.
- 21 A. Um-hmm.
- 22 Q. Is that illegal to only win \$.40?
- 23 A. What happens is that --
- 24 Q. Is that illegal to win \$.40?

- Page 112

  A. But again, you know what you're
- 2 playing for prior to the starting of the game.
- 3 In other words, you made a selection to pick
- 4 that teddy bear up.
- 5 Q. I understand that. I'm asking --
- 6 A. On this machine -- if I could
- 7 finish.

1

- 8 Q. You can. You can answer my
- 9 questions too.
- 10 A. And I am.
- 11 Q. Okay.
- 12 A. On this machine, what happens is, it
- 13 decides what the value of the prize that I'm
- 14 playing for.
- 15 Q. Is there any in this --
- 16 A. Now me, as a crane, I make that
- 17 decision on what I'm picking up, and I believe
- 18 that's the question you asked me.
- 19 Q. Does the statute say that the prize
- 20 has to be announced ahead of time? Is there
- 21 anything in the statute that says it has to be
- 22 announced ahead of time?
- 23 A. I believe that would be in the area
- 24 of chance.

#### Page 111

- 1 A. In the way that machine operates,
- 2 yes.
- 3 Q. Okay. Let me ask you this then. If
- 4 I played a crane game?
- 5 A. Okay.
- 6 Q. And crane game is a game of skill;
- 7 assuming they don't put the flush down and
- 8 assuming the claw actually has tension in it
- 9 and it can pick something up?
- 10 A. And then there's about 50 other
- 11 things that would be --
- 12 Q. Assuming --
- 13 A. It's a perfect crane game?
- 14 Q. Correct, it works perfectly.
- 15 A. Right.
- 16 Q. All right. And I'm the best crane
- 17 player you've ever seen. I can wheel this way
- 18 and wheel this way and I can pick those
- 19 stuffed animals up one at a time?
- 20 A. Right.
- 21 Q. And I can empty the machine?
- 22 A. Right.
- 23 Q. All right. Stuffed animal is worth
- 24 what, \$.10, \$.20, \$.30?

Page 113 No, I'm asking you, does the statute

- Q. No, I'm asking you, does the statuteindicate the prize must be announced ahead of
- 3 time, for a single task game or play?
- 4 A. In those exact words, no.
- 5 Q. All right. Now, if you have a
- 6 competition, contest, or tournament, the prize
- 7 needs to be announced ahead of time, doesn't
- 8 it, by statute?
- 9 A. Yes.
- 10 Q. So in a contest, competition, or
- 11 tournament, I need to know what I'm playing
- 12 for, but by exclusion, the statute doesn't say
- 13 anything that it needs to tell me ahead of
- 14 time what I'm playing for. Never says those
- 15 specific words, does it?
- 16 A. Does not say those specific words.
- 17 Q. All right. Now, let me ask you
- 18 this. Go back up to the machine where you
- 19 showed something about 60,000?
- 20 A. Yes.
- 21 Q. And I don't know where it is on here
- 22 because, again, I don't know these machines.
- 23 A. You're not under oath.
- 24 Q. Well, I don't know how to work the

29 (Pages 110 to 113)

_			
Page	1	1	4

1

- 1 computers. I may know the innards of them,
- 2 but not the computer. All right. Down at the
- 3 bottom you indicated 60,000?
- 4 A. Yes.
- 5 Q. Now, that's 60,000 possible --
- 6 A. Combinations.
- 7 Q. -- tiers?
- 8 A. Combinations.
- 9 Q. It's not 60,000 plays?
- 10 A. Correct. Combinations.
- 11 Q. I think we may have been mistaken by
- 12 that. So there are 60,000 possible tiers that
- 13 are going to appear on the screen?
- 14 A. Correct. And that's going to be
- 15 relating to the number of lines selected,
- 16 would be the determining factor of how many
- 17 actual game plays there would be.
- 18 Q. Do you know how many possible
- 19 combinations of puzzles there are? Puzzles,
- 20 the puzzles that appear on the screen? That's
- 21 a puzzle right there, is what I call it; it's
- 22 a puzzle, a task, a game, a play?
- 23 A. Um-hmm.
- 24 Q. Do you know how many possible

## Page 116 involves a task to play the game, I guess the

- 2 term the statute uses is a skillful game.
- 3 A. The task is technically the entire
- 4 piece. What we're saying is that you have to
- 5 successfully complete the puzzle to have
- 6 access to the prize.
- 7 Q. Okay. And so to do that involves
- 8 some skill?
- 9 A. Yes.
- 10 Q. It may be minimal skill but it's
- 11 some skill?
- 12 A. Yes.
- 13 Q. And the players, every player, when
- 14 they come up, can win -- has the opportunity
- 15 to win each and every time they play the game?
- 16 A. That's correct.
- 17 Q. And they have the opportunity to
- 18 lose each and every time they come up?
- 19 A. That's a possibility.
- 20 Q. Okay. Now, you testified here
- 21 earlier with the Chess Challenge and Gone
- 22 Fishing game, and that was not the case, they
- 23 had some plays that you could walk away and
- 24 automatically win, correct?

#### Page 115

- 1 variations there are of this particular game?
- 2 A. Well, I could do the math, but --
- 3 Q. 109 million, would that be about
- 4 right? Eight to the ninth power?
- 5 A. It would be --
- 6 Q. A large number?
- 7 A. Right, right.
- 8 Q. And so out of those 109 million
- 9 combinations, the computer, on its own,
- 10 decides we're going to use these 60,000?
- 11 A. Right, but it's not going to exceed
- 12 that.
- 13 Q. Correct. We're going to use this
- 14 many tiers?
- 15 A. Right.
- 16 Q. And we're going to have -- this
- 17 particular machine, I think, had 30,000 plays
- 18 at one time, or the cartridge had 30,000
- 19 plays?
- 20 A. Right.
- 21 Q. I just wanted to make sure everybody
- 22 knew that amount.
- Now, you testified in Meigs County
- 24 and you also testified here that the game

- 1 A. Correct.
  - 2 Q. So this machine, you can have no
  - 3 automatic winners?
  - 4 A. No. But you could randomly select
  - 5 and by chance win, by pressing the button,
  - 6 just like you said, it's impossible to guess
  - 7 the wrong answer; you could certainly guess
  - 8 the right answer.
  - 9 Q. Right. And if you randomly
  - 10 selected, you would be right 11 percent of the
  - 11 time, one out of nine?
  - 12 A. But it could be the one that has the
  - 13 \$2,800 prize.
  - 14 Q. Oh, I understand that.
  - 15 A. Right.
  - 16 Q. Right, but there's nothing in the
  - 17 statute that says -- the prize can be anything
  - 18 of value, correct?
  - 19 A. And there doesn't have to be a
  - 20 prize.
  - 21 Q. Right. If this game was played out
  - 22 -- that's my next question, it's perfect. If
  - 23 the game was played without money, skill-based
  - 24 game, so the only problem that you've got is

30 (Pages 114 to 117)

Page 117

С	ase 3:19-cv-01470-JPW Document 17	0-5	Filed 02/28/22 Page 32 of 81
	Page 118		Page 120
1	the payment of the prize?	1	A. No, actually I think the first time
2	A. Well, actually, I would back up on	2	was probably in February-March period.
3	that, because I think you took a quantum leap.	3	Q. Okay. And where did you look at it?
4	What happened is, is that if you win a prize	4	A. That would have been in Stark
5	by the application of chance, okay, that in	5	County.
6	fact would be a violation. So even if you won	6	Q. Okay. And do you know anything
7	a free game, the value of that free game,	7	relating to the fact that the manufacturers
8	replay of the machine, has value, so that	8	and distributors and end users of
9	would be a prize.	9	Tic-Tac-Fruit tried to get the Department of
10	Q. I understand that. I'm just talking	10	Public Safety to look at this ahead of time;
11	about in your analysis	11	do you know anything about that?
12	A. I wanted to make sure everybody	12	MR. LAMPKE: Objection, relevance.
13	understood that.	13	Witness is not an employee.
14	Q. Okay. In your analysis, if there	14	CHAIRMAN MCNAMARA: The question is
15	were no prizes, you just play the game?	15	does he know anything about it. The answer
16	A. They just completed the tic-tac-toe.	16	probably is no, but
17	Q. Correct. Skill game?	17	A. I know there was a booklet being
18	A. If you're just playing tic-tac-toe,	18	circulated that was presented to prosecutors
19	correct.	19	in the area. I don't know if the actual

20 Q. Right. Skill-based game. By

21 definition in Ohio, skill-based game?

22 A. Yeah, if you're just playing

23 tic-tac-toe.

24 Ο. Okay. Now, when did you first look

22 Q. Giving cash as a prize is clearly 23 okay in Ohio?

those.

20

21

24 Uh-huh, on a skill-based machine,

Attorney General's office received one of

Page 119

1 at the tic-tac-toe, do you remember?

2 Tic-tac-toe? Α.

3 Q. Tic-Tac-Fruit, excuse me. March,

4 Stark County?

5 No, before that. I thought it was A.

6 Lorain County.

7 Q. It's been in Lorain County?

8 Α. Never officially, but it was there.

9 Q. Okay. Can you elaborate on that?

10 Α. No. If you'd like me to, I will.

Well, I just asked that question. 11 0.

12 The machine was presented by an

13 individual who wanted to bring the machine

14 into Lorain County.

15 Oh, okay, so you have looked at it Q.

16 up there?

17 Α.

18 When were you first contacted by the

19 Department of Public Safety to look at this,

20 if you recall.

21 Α. Officially, it was with Matt Lampke,

22 but I have discussed it with other people on

23 the telephone.

24 Q. Okay. But when was that? July? 1 correct, for a contest.

2 Right. Is golf a game of skill?

Maybe not the way I play it, but --3

A. I have a business handicap, I don't

5 know.

6 Q. But is it a game of skill, in your

7 opinion?

8 A. Yes, yes.

All right. The three chairmen and 9 Q.

you are on the golf course. Chairman McNamara

11 is at a golf outing, all of you are at a golf

12 outing. He takes a mighty swing with a nine

13 iron from a par of three at 138 yards, into

14 the cup, wins \$1,000. Charity golf outing.

15 Is golf still a game of skill?

16 A. The result of that action, if it was

17 based on his skill, and the skill that he put

into that shot is based on skill, then, yes, 18

19 it would be.

20 CHAIRMAN MCNAMARA: I can't hit a

21 nine iron 138 yards.

22 THE WITNESS: Then it would be a

23 game of chance, in his case.

24 (Laughter.)

31 (Pages 118 to 121)

Page 121

С	ase 3:19-cv-01470-JPW Document 17	0-5	Filed 02/28/22 Page 33 of 81
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Page 122 BY MR. GEARHISER: Q. Next day, Mr. Riedthaler and the three chairmen are out, same golf course, different charity outing. Chairman McNamara now takes a seven iron because he can't hit a nine iron 139 yards. Mighty swing, takes it one bounce, into the cup. He wins \$5,000. Still a game of skill, correct? Golf is still a game of skill?  A. Yes. Q. All right. Three times in a row, third charity golf outing, the four of you are out there again. Chairman McNamara one more time, hole-in-one, million shot, can't believe it. There was no award that day, because they've now moved it because they know Chairman McNamara is such a good golfer that he'll get that hole-in-one. Now, I would assume golf is still a game of skill even though they won no prize?	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	A. Was he given a card to describe it?  Q. No. He just showed up.  A. He just showed up and gave \$500?  Q. Right.  A. We've moved it toward chance that he wouldn't  Q. So now golf is a game a chance?  A. What did he win by not knowing what you're doing and playing when you consider that chance?  Q. Well, you're asking me the question.  I guess the question I'm going to ask you is, isn't golf a game of skill no matter what you do?  A. It's a game of skill, I'll give you that.  Q. All right. So no matter how you play it, poorly or well, it's a game of skill?  A. Let's take it a little
21 22 23 24	A. That's correct. Q. So one day \$1,000, one day \$5,000, one day zero? A. Um-hmm.	20 21 22 23 24	<ul> <li>Q. I'm asking a question.</li> <li>A. No, it's not. And I can give you an example.</li> <li>Q. So wait a minute</li> <li>A. You're</li> </ul>
1 2 3 4 5 6 7	Page 123 Q. But the game being played, the task to complete to get the hole-in-one wins him the prize? A. Right. But he's aware of the prize prior to starting the event. Q. Okay, let's say he doesn't know, he just shows up. He's called the day before by	1 2 3 4 5 6 7	Page 125 Q. Just a second. You've now said golf is not a game of skill. A. If you're placing a wager on an individual hole, it would then become public gaming. Q. I understand that. I didn't ask if you were wagering. I just asked you, is golf

Chairman -- or by Vice Chairman Gardner and

10 to play some golf. He doesn't know, just

12

13

15

17

18 Q.

19

20

21 A.

22

23 Q.

24

14 A.

know the prize?

price to play that.

he will receive this --

charity.

idea.

says, hey, come to the tournament, we're going

shows up, doesn't know ahead of time. Is golf

Well, what you have to do is back

Let's say it's a \$500-per-man fee to

He knows that if he gets this hole

And he didn't know it, he had no

up. One thing, you don't have the requirement

no longer a game of skill because he didn't

of paying a price, because he didn't pay a

get -- because we're raising funds for that

ever not a game of skill?

9 And I'm saying, in that case, you Α.

10 could make it public gaming. A violation.

11 Q. The activity of gambling on the game

12 of golf --

13 A. Right.

14 Q. -- is illegal, I understand that.

15 A. Okay.

16 Q. But the game of golf, what we're

17 getting to, not what you do.

18 Α. I understand.

19 Q. The game of golf is a game of skill

20 no matter what, correct?

21 A. Yes.

22 And pressing that button, letting

23 the machine play, and picking like this?

24 You won. Α.

32 (Pages 122 to 125)

1	Page 126	1	Page 128 Some switch?
2	Q. Right. A. By random chance.	1 2	
3	<ul><li>A. By random chance.</li><li>Q. Absolutely. One out of nine times I</li></ul>	3	A. From what I understand, from a report, that the machine can be changed.
4	can do it, correct?	4	Q. Can you change it for us?
5	A. Right.	5	A. No, I cannot.
6	Q. Now I play it again. Close my eyes.	6	Q. Can anybody change it?
7	Lose. Oh, I did win. Won some, lost some.	7	A. I'm just going by a report that I
8	Again, have the opportunity to win, correct?	8	looked at.
9	A. But you still won by your	9	Q. Whose report?
10	application, in your case, of pure chance.	10	A. Mr. Farley's report.
11	Q. What I'm saying is, I understand	11	Q. Mr. who's?
12	that 10 or 11 percent of the time you can win	12	A. Farley's report.
13	this. But if I am a player, which you have	13	Q. Oh. Do you have that here?
14	identified who can win each and every time, if	14	A. If I could borrow it?
15	I am doing it by pure by chance, by numeric	15	Q. I don't think you'll find that in
16	number, what's the odds of me being correct on	16	here.
17	this machine? It's one out of nine, correct?	17	MR. LAMPKE: I don't know where it
18	A. Right.	18	is. I can look for it during a break.
19	Q. Or 11 percent?	19	Q. You can look for it later. You're
20	<ul><li>A. Um-hmm, right.</li><li>Q. So 11 percent of the time I come up</li></ul>	20 21	going to be on the stand for a long time,
22	here and do this?	22	don't worry. You guys can look at it. We'll get to that.
23	A. Right.	23	A. Okay.
24	Q. But if I'm a good player, I'm going	24	Q. So you got no I've been told for
			Q. Oo you got no are accounted.
	Page 127		Page 129
1	to win 100 percent of the time?	1	the experts who look at these computers to
2	A. Right.	2	determine how they're working and how they are
3	Q. And if I'm a bad player, a really	3	operating, they build a computer program, they
4	bad player, I win no percent of the time. Now,	4	do all those things to analyze the aspects of
5 6	if I'm a really good golfer, I can shoot a	5 6	the computer. I assume you don't have a lab?  A. Not really, no.
7	certain score. If I'm a really bad golfer	7	• •
8	but no matter what, golf is still a game of  A. What happens if every time you	8	<ul><li>Q. Okay, so what you do is you</li><li>A. Look at the components.</li></ul>
9	played golf they moved the hole to a different	9	Q. Right. And you've done this for a
10	position, to a different location?	10	long time, so I understand that, but you don't
11	Q. They do every time I play.	11	have any kind of lab or computer work, you
12	A. While the ball is in the air?	12	just look at it and try to determine as best
13	Q. Pardon?	13	you can that's the case?
14	A. Would you consider that game of	14	A. No.
15	skill or game of chance, if when you hit the	15	Q. Since July of '03, have you looked
16	ball, they moved the hole?	16	at any skill-based games that you think are
17	Q. Do you have a computer program that	17	illegal in Ohio?
18	analyzes these?	18	A. Yes.
19	A. No, I do not.	19	Q. Which ones?
20	Q. And so how did you analyze it?	20	A. Crane machines. I've looked at
21	A. What do you mean how did I analyze	21	several roll-the-ball-down type games.
22	it?	22	Q. Let's go to the crane game then,
23	Q. Well, is there something in here	23	because you had indicated that earlier.
24	that could change this to a poker machine?	24	A. Yes.

33 (Pages 126 to 129)

Page 130

- 1 Q. Who picks out the prize that's going
- 2 to be in the machine, who picks out the prize?
- 3 A. The machine.
- 4 Q. No, but I mean the vendor of the
- 5 machine -- somebody picks it out?
- 6 A. The machine picks it out by random.
- 7 Q. But it's the operator, effectively,
- 8 correct?
- 9 A. It's the computer.
- 10 Q. All right, but it's somebody who
- 11 owns the machine, it's effectively the guy who
- 12 is picking the prizes; wouldn't you say that's
- 13 the case?
- 14 A. No. What you buy is a software
- 15 program. That program randomly selects the
- 16 number of lines of a win and then randomly
- 17 selects what the prize is going to be.
- 18 Q. If I asked the computer, I say,
- 19 listen, I'm the one -- if I'm a vendor and I
- 20 say give me one of those Tic-Tac-Fruit but I
- 21 need one \$200 winner, one \$75 dollar, I need
- 22 all these winners, and I tell the machine
- 23 software manufacturer to do that.
- 24 A. Right.

- Page 132
- prizes that are going to be awarded withSkee-Ball?
- 3 A. Correct.
- 4 Q. Well, effectively, in Skee-Ball,
- 5 generally speaking, it's tickets?
- 6 A. Right.
- 7 Q. Now, have you seen Skee-Ball; do you
- 8 think Skee-Ball is a game of skill?
- 9 A. Yes.
- 10 Q. All right. Now, if I put \$1.00 in
- 11 Skee-Ball and I get the biggest prize or the
- 12 smallest hole so I get the most amount of
- 13 tickets?
- 14 A. Um-hmm.
- 15 Q. And I take those tickets over?
- 16 A. Um-hmm.
- 17 Q. Do I get \$1.00 back? What do I get?
- 18 A. You would select a prize.
- 19 Q. Right, and generally speaking, isn't
- 20 that prize valued well under \$1.00?
- 21 A. Well, if you're talking retail value
- 22 or what the merchant paid for the prize.
- 23 Q. Well, what the merchant paid for it,
- 24 clearly.

Page 131

- 1 Q. The computer still picks them out,
- 2 but somebody has identified what winners are
- 3 going in there?
- 4 A. To set the odds.
- 5 Q. Right.
- 6 A. Right.
- 7 Q. So somebody identified that these
- 8 were the winners that were going to be in
- 9 here?
- 10 A. Correct.
- 11 Q. All right. Now, the crane game,
- 12 somebody puts the stuffed animals in there,
- 13 correct?
- 14 A. Correct.
- 15 Q. So the operator or the machine
- 16 manufacturer picks the prizes here, then the
- 17 machine manufacturer or the operator picks the
- 18 prizes that are in there?
- 19 A. Um-hmm.
- 20 Q. Skee-Ball, same thing, isn't it?
- 21 A. Based on the successful completion
- 22 of the task.
- 23 Q. Correct. But I mean, it was the
- 24 operator or the manufacturer that picks the

- 1 A. Okay, well, there's two different
- 2 halves.
- 3 Q. I know.
- 4 A. I as a player would look at the
- 5 retail value and then make a decision whether
- 6 I wished to play that machine based on my
- 7 skill set knowing that prize was available to
- 8 me.
- 9 Q. When I play Skee-Ball, do I know
- 10 what prize I'm going to get?
- 11 A. Well, you know how many tickets you
- 12 can win based on a schedule based on number of
- 13 points you receive. That's posted usually on
- 14 the machine.
- 15 Q. But do I know what prize I'm going
- 16 to get?
- 17 A. Well, you can walk to the counter,
- 18 know what the prizes are, and then make a
- 19 conscious decision should I play that game.
- 20 Q. Right. And the statute, once again,
- 21 doesn't say that you have to show the prize
- 22 ahead of time?
- 23 A. No.
- 24 Q. Is there anything in the statute

34 (Pages 130 to 133)

Page 133

Page 136 Page 134 1 that says you have to win more than you wager? money on a machine. That was your question. 1 2 2 On a skill-based amusement machine? A. Q. 3 MR. LAMPKE: Objection, asked and 3 Α. Making money, a profit, no. 4 4 answered. Q. And so there's nothing wrong with CHAIRMAN MCNAMARA: Yeah, I don't 5 the Tic-Tac-Fruit, if this particular machine 5 6 think this man is necessarily an expert on 6 was to pay out 95 percent to the player, the 7 statutory law. 7 only objection you have is to the --8 COMMISSIONER GARDNER: While we 8 That's not true. A. 9 have this pause, I need to ask, you said the 9 Q. Okay, well, I'll withdraw the manufacturer sets up the percentage of the 10 10 question. Let me ask you this. program. The way I understand it, he sets up 11 11 A. Sure. the program, and I imagine he can pull that 12 12 Q. The statute says that if it's a slot cartridge out there and put another cartridge machine, it's less skill than chance, correct? 13 13 14 in there, a computer disc or whatever, but my 14 A. question is, can this be programmed down to 85 15 15 Q. And if it's a skill-based amusement 16 percent or 65 percent? 16 machine, it's more skill than chance? 17 THE WITNESS: If the manufacturer 17 A. 51 percent. chose to, he can make it no wins. 18 18 Q. And in fact, the Attorney 19 COMMISSIONER GARDNER: Or all wins. 19 General's office gave us a nice written 20 THE WITNESS: Or all wins. 20 opinion last year on that particular matter. 21 COMMISSIONER GARDNER: That's what I 21 A. From Erie County, which I was 22 wondered. 22 involved in. 23 BY MR. GEARHISER: 23 Q. Now, have you read that? 24 There's nothing that prohibits an 24 A. I was involved in that case. Q. Page 135 Page 137 1 operator from making money on games of skill? 1 Q. It wasn't Erie County; was it Erie 2 A. 2 County? No. 3 3 Ο. So the fact that this machine -- if Α. Erie County. What happened was that 4 I was right and played this machine and played 4 they had machines and I did analysis with -- I 5 all of the plays that were in it and I won the 5 had met with the prosecutor. We had a maximum payout, which you, I think, have discussion whether it should be prosecuted or 6 6 7 determined to be 95 or maybe 97 percent? 7 not. The prosecutor at the end of our

8 A. We're just saying if it was set at 9 95. 10 Q. Right. So if it's set at 95 percent and I win the maximum amount of money, the 11 operator makes money? 12 13 A. Right. 14 Q. And there's nothing wrong with that? In this instance? 15 Α. No, in the instance of the statutory 16 Q. instance of skill-based law, there's nothing 17 wrong with an operator making money? 18 19 A. For the slot machine? 20 Q. We're not talking about a slot

machine, we're talking about this game, sir.

that's why I asked you specifically; you said

You're talking about a machine,

there's nothing wrong with an operator making

21

22

23

A.

8 discussion felt that he would write a letter to the Attorney General asking his opinion. 9

Because we originally had discussed at what 11 point does it become gambling. If we were to ask defense counsel, it would have to be 100 12 13 percent chance versus, you know, maybe if I

14 looked at it, had to be 100 percent skill, so somebody has to set that bar, and it was 15 during the course of the conversation that the 16

17 prosecutor wrote that letter, as a result of

18 that letter.

10

19 Q. From Seneca County? 20 A. Seneca County, I'm sorry. Q. You kept saying Erie County. 21

22 Α. Correct. 23 Okay, I just wanted to make sure we Q.

24 were talking about the same thing.

35 (Pages 134 to 137)

- 1 A. Right.
- 2 Q. All right. So it's the job of this
- 3 Commission to determine if this machine is 49
- 4 or 51 percent skill?
- 5 A. Well, there's another half to that,
- 6 and I think you're missing that, is that, if a
- 7 person that's not participating in the game
- 8 could control the outcome, okay, then the
- 9 machine isn't. By setting the percentage --
- 10 in other words, if you play a truly
- 11 skill-based machine, nothing should prohibit
- 12 you from winning 200 percent, 300 percent.
- 13 Q. Where does it say that in the
- 14 statute? Please point to a spot in the
- 15 statute that it says you've got to win more or
- 16 you have to have the opportunity to win more?
- 17 A. No, it says the outcome is
- 18 determined by a person not playing -- by
- 19 putting a governor for limiting the amount of
- 20 wins, then that's violative of the definition.
- 21 Q. Under what court decision? Under
- 22 your interpretation, correct?
- 23 A. The Commission will make the
- 24 decision.

1

- Page 140 and say how many components involve skill
- 2 versus --
- 3 Q. Well, let's do it, because we need
- 4 to know this, maybe the Commission needs to
- 5 know this.

1

- 6 A. Okay. What you would first do --
- 7 Q. What component -- what component is
- 8 a skill-based component on this machine?
- 9 A. Well, the skill-based is just the
- 10 ability to correctly complete the series.
- 11 Q. Putting money in, that takes skill?
- 12 A. We'll give you credit for that, one
- 13 percent, two percent.
- 14 Q. But you think that's skill?
- 15 A. Well, it requires the manual
- 16 dexterity to put the money in the machine.
- 17 That would be interpreted as skill.
- 18 Q. Under what you've found to be in
- 19 your --
- 20 A. We were just using that as -- it
- 21 takes required some skill, some people maybe
- 22 couldn't pick up money.
- 23 Q. Pressing the button takes some
- 24 skill, yes or no?

Page 139

- Q. But you're making that statement, so
- 2 under the circumstances, your interpretation?
- 3 A. It's my interpretation.
- 4 Q. Is outcome defined by statute?
- 5 A. No, it's not.
- 6 Q. And I might define outcome whether I
- 7 win or lose, and you define outcome whether I
- 8 win or lose money, I think?
- 9 A. Well, that's the final outcome.
- 10 Q. I understand that. But I'm just
- 11 saying, we don't have a definition of outcome.
- 12 A. That is correct.
- 13 Q. But you've determined that it's more
- 14 than 51 percent skill -- excuse me, more than
- 15 50 percent chance?
- 16 A. Correct.
- 17 Q. All right. Give me a percentage.
- 18 A. I'd say we were probably 75 percent.
- 19 Q. Okay. So now we know that you have
- 20 a figure of 75 percent?
- 21 A. Right.
- 22 Q. Can you tell me how you can quantify
- 23 the amount of skill?
- 24 A. Well, you can do it by components

- 1 A. Yes.
- 2 Q. For hitting this button here?
- 3 A. Yes.
- 4 Q. And then making a selection takes
- 5 some skill?
- 6 A. You missed a major component. The
- 7 machine went out and selected two components.
- 8 Q. I'm asking the questions, and
- 9 listen, I just want to ask you to answer my
- 10 questions. You'll be able to give any
- 11 testimony you want to give when they do that.
- 12 I'm asking a question about in picking a
- 13 location, does that involve skill?
- 14 A. That wasn't your question. You said
- 15 let's go over the components of skill versus
- 16 chance. You started with a logical sequence
- 17 of putting money in the machine.
- 18 Q. And then I went here.
- 19 A. And then you asked me --
- 20 Q. And now I'm going to here.
- 21 A. And as soon as you hit there, that's
- 22 where there's an element of chance coming in.
- 23 That's what I thought you were asking me to
- 24 testify about, where I got my percentage

36 (Pages 138 to 141)

Page 141

	Page 142		
numbers from.		1	in one o

- 2 I understand that's what you think I Q.
- 3 asked.

1

- 4 A. Okay.
- Let me asked you what I asked. 5 Q.
- 6 A.
- 7 Let me try to explain myself better. Q.
- A. 8 Sure.
- 9 Q. What I'm asking is, picking a
- location here, just doing the picking, is that 10
- 11 skill, does that take skill?
- 12 A. Again, you can win by the
- application of not choosing, randomly picking. 13
- So is your answer yes or no? 14
- It requires skill, and at other 15 A.
- times you can win by improperly selecting. 16
- 17 I understand. Is it skill or not a
- skill? It's just a simple question, yes or 18
- 19 no?
- 20 A. Yeah, and I'd say in some cases,
- 21 yes, it is skill, and sometimes it isn't.
- Okay. So you're not sure. 22
- 23 MR. LAMPKE: Objection,
- mischaracterizes the testimony. 24

Page 144

- in one or two percent, hitting the button is
- 2 one or two percent, and picking the rest is
- 3 that, okay.
- 4 Now, once I've done that, I've
- completed all of the participation by the 5
- player, correct? Once I've completed putting
- 7 the money in, pressing the button, picking a
- 8 location, I've done all the participation I
- 9 can do?
- If you don't count your 10 Α.
- 11 noninvolvement in the spinner and the flip
- 12 game.
- 13 Q. In this game, it awarded me \$.20.
- Well, you have to do activity, but 14 Α.
- 15 it produces -- it's of no value, your activity
- performed, because it's already selected the 16
- 17 prize that you're receiving.
- Okay. 18 Q.
- 19 A. But you're still performing an
- activity, but the activity you're performing 20
- has no effect on the outcome, because it's 21
- already been decided by the machine. 22
- 23 If this machine put the field that
- you were going to play prior to your putting 24

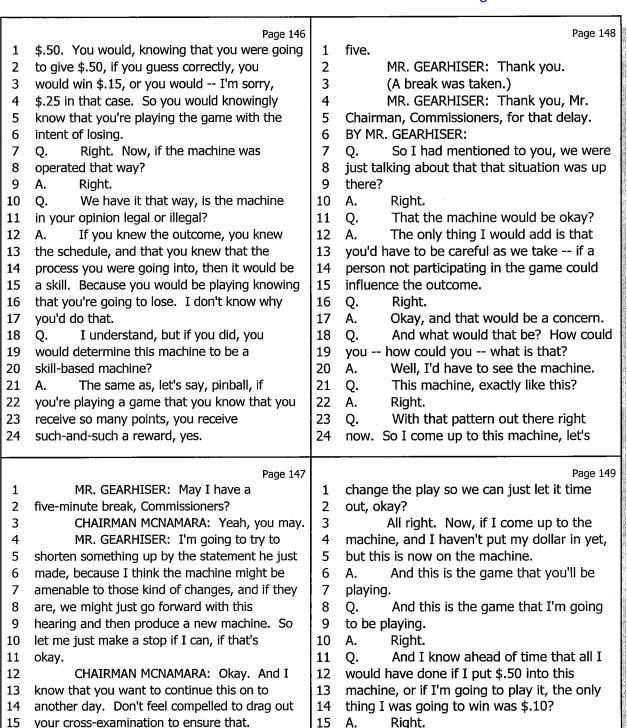

Page 143

- All right. So putting the money in, 1 Q.
- of the 25 -- of the 25 percent skill, what are 2
- we getting for the money? 3
- 4 One percent. I mean, I'm --A.
- 5 You don't really know, do you? Q.
- No. Not on --6 Α.
- How about -- how about pressing 7
- this? What percent skill is this? 8
- 9 A. I'm going to say less than one 10
- percent.
- 11 Q. And then picking this, is that the
- 12 other 23?
- Yes. 13 Α.
- 14 All right. Now, on what basis did Q.
- you form that opinion? 15
- The separate components of the 16
- 17 machine.
- 18 Q. Is that in your report anywhere?
- I go through the components of the 19 A.
- 20 machine.
- Is the 75/25 percent --21 Q.
- 22 No. You had asked me to pick a A.
- 23 number, and I did.
- 24 Okay. So you've picked that putting Q.

Page 145

- 1 the dollar in, would that change your opinion
- 2 any?
- 3 If the player knew what he was Α.
- 4 playing for, it was not randomly selected, you
- 5 know, after the start of the game --
- Right, then --6 Q.
- 7 If -- if I could? Α.
- I'm sorry, let me withdraw the 8 Q.
- question. Let me just ask this: That's the 9
- field, all right? So I know when I come up 10
- here, I've got the opportunity to win this way 11
- with three oranges? 12
- 13 You have the capability of winning Α.
- 14 \$.15 for your investment.
- 15 Q. Limes if I want to press this
- 16 button?
- 17 Α. Right.
- Oranges if I want to press that 18 Q.
- 19 button. Oranges if I want to press that
- button. Or I don't know what was over here, 20
- 21 but possibly oranges two ways, if I press that
- button. We already changed the screen. 22
- 23 Yeah, in this case, what you have A.
- 24 is, let's say you took the minimum and bet

37 (Pages 142 to 145)

your cross-examination to ensure that. 16 MR. GEARHISER: No. We have four or five witnesses that I know will probably not 17

18 -- we'll not get to today.

19

MR. LAMPKE: Only one was sworn in.

MR. GEARHISER: I understand. The 20 21 other two are not here or were coming, because

22 one is an Ohio State University professor; he

still had to do his job. So he'll be here. 23 24

CHAIRMAN MCNAMARA: All right. Take

Α. Right.

16 Q. If that was up there and everything

else is the same on this machine? 17

18 A. Right.

19 Q. I think you're giving it your

20 blessing?

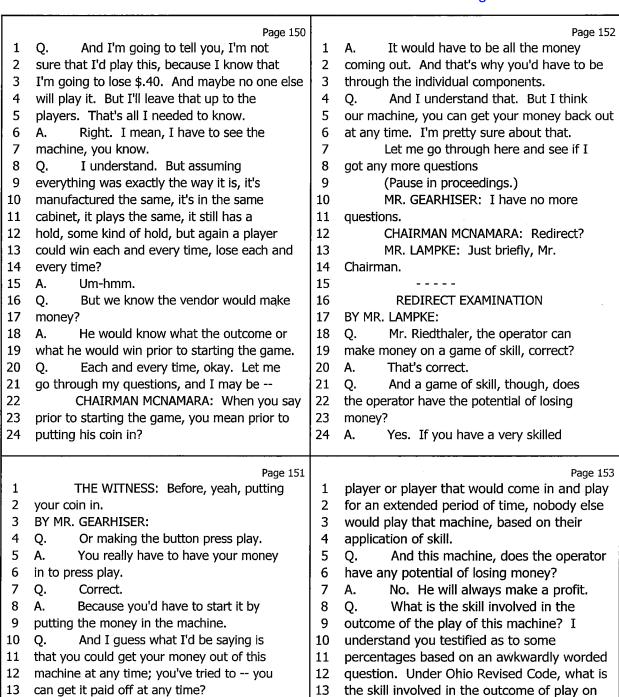

21 Α. I wouldn't see a problem with it.

22 Because you're basing -- your skill is

completing the task as well as knowing what 23

24 your prize is that you're going to receive.

38 (Pages 146 to 149)

14 Α. Um-hmm.

15 Q. So I mean, if you put \$20 in and see

that pattern and went (Indicating) and press 16

17 the button, you can get all your money back

18 out?

19 Yeah, see some of the machines Α.

require a minimum payout and are adjustable to 20

21 \$5.00.

22 Q. I understand that.

23 A. And there's a way to do that.

24 Q. Correct.

14 this machine?

15 Α. If you're actually talking about the actual task, the task doesn't start with the money, doesn't start with the press button, okay; it actually starts with the activation

18 19

of devices. As soon as you press that button,

the first thing that happens, it selects a 20

21 line. That's done randomly. And the second

22 choice it makes, then, it decides what prize

23 you're going to win.

24 Then the actual images of what Mr.

39 (Pages 150 to 153)

16

17

Page 156 Page 154 Gearhiser referred to as the actual puzzle tic-tac-toe as long as he gets to go first. 1 1 2 appears on the screen. 2 A. 3 So if we were to stop it right 3 Would he be a pretty good winner at Q. 4 4 there, two thirds of the activity would have this game? 5 already occurred by chance. One would be 5 It wouldn't take too long to master A. 6 skillful. We then go to two other components it. But ultimately, if he had the dollar, 6 7 inside the machine, one being the flip, one he'd only get to 95. Let's say it was 97, 8 being the spinner. 8 he'd only get the 97 percent. 9 Again, when you actually -- it makes 9 Q. I understand. 10 the player believe that he can increase the 10 Α. Whereas, if he was truly a skillful 11 amount of wins based on his selection, when in player and he was playing, he could continue 11 12 fact those selections have already been 12 to play based on those wins, there's no 13 predetermined by the machine; it's already 13 governor that would prevent him from playing. 14 decided how much it's going to pay out. 14 CHAIRMAN MCNAMARA: Thank you. Any So that's where I'm getting that, 15 15 other questions? you know, that number from. 16 16 MR. GEARHISER: No questions. Now, the game board that appears, 17 17 CHAIRMAN MCNAMARA: Thank you very 18 and the various columns rotate? 18 much. 19 COMMISSIONER COLONNA: There's only 19 A. Yes. 20 20 Q. When you activate the machine, do one thing I got to tell you: Out of all 21 those nine fruit images randomly appear on the 21 three of us up here, there's only one golfer 22 screen? 22 out of this three, and that's Bob Gardner. 23 23 A. Actually, they're selected prior to, (Laughter.) 24 based on the selection made by the machine. 24 MR. LAMPKE: With the admission of Page 157 1 In other words, the machine selects what the 1 Exhibits A through D -- A through E, the 2 ultimate -- when they stop, what image is 2 Department would rest. 3 going to be displayed, that's been selected by 3 MR. GEARHISER: I've got no 4 the machine, the computer of the machine. objection, I think I've said, to A, E -- in 5 Okay. And based on that question, 5 the order they're coming in, A, E, C, or D. 6 then, what percentage do you believe the The only one I have objection to is B, which 6 7 machine is based on chance or random events 7 is the report, but I think the Commission is 8 occurring? 8 going to allow it in as it's an actual 9 9 A. It's going to be 75, 76 percent, investigative report. 10 somewhere in there. 10 CHAIRMAN MCNAMARA: Correct. The COMMISSIONER COLONNA: Could you 11 State's exhibits are admitted. 11 speak into the mic, please. 12 12 MR. LAMPKE: Thank you. 13 I'm sorry. 75, 76 percent, 13 (Discussion off the record.) somewhere in there, because we know it's two 14 14 thirds plus the spinner plus the flip. 15 15 MICHAEL PACE 16 MR. LAMPKE: That's all the 16 being previously sworn, testifies 17 questions I have. 17 and says as follows: 18 18 19 **EXAMINATION** 19 DIRECT EXAMINATION 20 BY CHAIRMAN MCNAMARA: 20 BY MR. GEARHISER: 21 Q. Mr. Riedthaler? Mr. Pace, would you identify 21 Q. 22 A. Yes, sir? 22 yourself for the record, please. 23 I have a five-year old grandson who 23 Α. My name is Michael R. Pace. Q. has learned how to beat me every time at 24 COMMISSIONER COLONNA: Speak into

40 (Pages 154 to 157)

1

- 1 the microphone, please.
- 2 A. My name is Michael R. Pace.
- 3 Q. And, Mike, by the sound of your
- voice, you're probably not from Ohio. Where 4
- 5 do you hail from?
- 6 I grew up in Atlanta, I traveled all
- 7 over the United States, and I've lived the
- 8 last eight years in the Rocky Mountains but am
- 9 now back in Atlanta.
- All right. Do you have a business 10 Q.
- in Atlanta? 11
- 12 I have nine businesses in Atlanta. A.
- All right. And can you give the 13 Q.
- 14 Commission a background on your education.
- I went to Northside High School in 15 Α.
- Atlanta. After the eighth grade, I spent most 16
- 17 of my time in computer centers instead of
- 18 going to school. I had a first-class FCC
- license by the time I was 16 through a 19
- 20 correspondence course, which was the
- 21 equivalent of a two-year electrical
- 22 engineering degree. And I started fixing
- 23 pinball machines when I was 12, and I started
- designing games when I was 13. And I designed 24

memory, the way it works. I wrote the

Page 160

Page 161

- 2 operating system that runs on the board.
- I came up with the game concepts as to how 3
- the game should play to comply with law. And
- then I also did 100 percent of the programming
- 6 of it as well.
- So would it be fair to say that 7 Q.
- although there may be some people who gave you 8
- ideas of what might or might not be a
- successful or enjoyable amusement device, 10
- 11 you've done all the computer work on this
- 12 particular machine?
- 13 A. And virtually all the concept stuff
- 14 as well.
- Q. All right. And did you build this 15
- -- was it your intention to build this to fit 16
- 17 Ohio law?
- 18 A. Absolutely.
- Is there a Tic-Tac-Fruit built for 19 Q.
- 20 any other state?
- 21 A. There's similar games which I
- 22 designed to meet the law in other states.
- 23 This concept here that evolved into the game
  - we did for Ohio was too skillful to work in

Page 159

24

- and developed the world's first countertop 1
- 2 game in 1979.
- Would it be fair to say that ever 3 Q.
- 4 since you were in, virtually, middle school,
- 5 you've been involved in electronic gaming or
- software of some type? 6
- 7 A. Yes. I had a degree from the
- 8 federal government that allowed -- or at least
- 9 the license allowed me to design, build, and
- 10 maintain TV stations' transmitters, that sort
- 11 of thing.
- 12 Q. And by your appearance here today,
- I'm assuming you know all about Tic-Tac-Fruit? 13
- 14 Yes, sir. I designed it. Α.
- 15 All right. And can you tell -- when
- you say you designed it, can you tell us what 16
- 17 you did to determine the -- or to make the --
- 18 I know you didn't physically make the cabinet,
- 19 but the software that runs the computer
- 20 program?
- A. 21 The board that's in it, the computer
- 22 board, I designed that particular board in
- 23 1989. I designed the entire board myself, the
- 24 computer, the way chips hook together, the

- other states and jurisdictions; it really only 1
- 2 had a home here, when the later features were
- added, were made to comply with Ohio law. 3
- 4 Q. Many other states have laws that use
- 5 definitions like "some skill"?
- 6 A. That's correct.
- 7 Q. I know that I've read that.
- 8 That's correct. A.
- 9 Q. And so Ohio would certainly be a
- standard we know that's a lot more than some 10
- 11 skill?
- Right. The game was so skillful 12 A.
- that it would not compete in states where they 13
- only required some skill. 14
- 15 Q. Okay.
- 16 Α. Players wouldn't play it.
- 17 Ο. And it's my understanding that
- 18 recently you have, besides building programs
- for -- what company are you currently 19
- president of that is involved with 20
- 21 Tic-Tac-Fruit?
- 22 A. I am chairman and CEO and owner of
- 23 Pace-O-Matic, which is still a Wyoming
- 24 S-corp., but we're based out of Atlanta.

41 (Pages 158 to 161)

- Q. And that company developed not only 1
- 2 Tic-Tac-Fruit but other gaming and/or
- skill-based games? 3
- 4 I design different type games for
- different jurisdictions, mainly in the United 5
- States but in several other countries in the 6
- 7 world as well.
- 8 And have you recently also been
- 9 qualified as an expert to testify on machines
- such as this or any other games? 10
- I recently represented the Georgia 11
- 12 Coin-Op Association in a criminal trial in
- Cobb County, Georgia, which is metropolitan 13
- Atlanta, where I was the expert for the 14
- 15 Coin-Op Association.
- And were you defined as an expert on 16 Q.
- behalf of the court at that time? 17
- 18 Α. Yes, sir.
- All right. And did you, just out of 19 Q.
- curiosity, in that particular testifying, did 20
- 21 you find some games complied with Georgia law
- 22 and some did not?
- 23 We had 14 games that had been
- 24 seized, and at this trial, I found most of

- Page 164 you really don't know what you're going to get
- at any one particular moment or one particular
- 3 play, but over an average you know exactly
- what you're going to get. 4
- 5 And where as slot machines, there's Q.
- -- and many of these poker machines and other 6
- machines, there's a, it's a what I call a
- random number generator or computer program in 8
- 9 there that tells me that Player 5 is going to
- 10 win and Player 10 is going to win and Player
- 20 is going to win, but all the other up to 20 11
- are going to lose. Is that basically the way 12
- 13 it operates?
- 14 A. I don't think so.
- 15 Q. Okay. Well, tell me how it operates
- 16 then.

24

5

8

- A. Which type of gambling device do we 17
- 18 want to talk about?
- 19 Q. The slot machine.
- 20 A. A slot machine. The earliest forms
- 21 of slot machines had mechanical reels, and
- 22 when the handle was pulled and released, all
- 23 three reels were spun and that there were
  - different timing gears put into them, slowly

Page 163

- them to be legal in Georgia, a couple of them to be illegal in Georgia, and several of them
- 3 that I just could not make a determination as
- 4 to whether they were legal or not, just by the
- 5 way they were set up.
- Okay. In Ohio, the slot machine is 6 Q.
- 7 a machine that operates with less than 50
- 8 percent skill, we know, by definition. Can
- 9 you tell us why, when you go in and you play a
- 10 slot machine, that it's based on whether
- 11 you're the right person at the right time; can
- you tell us why that operates that way, a slot 12
- machine? 13

1

2

- 14 A. You mean why it's driven by chance?
- 15 Q. Correct.
- 16 A. Computers are incapable of
- 17 generating random numbers themselves, so we
- 18 call it a pseudo random number generator, but
- 19 it's essentially the same for this argument.
- 20 A computer does generate random 21 numbers which are applied in a basic slot
- machine to randomize pictures, icons; they 22
- 23 even use random number generators in poker 24
  - machines to basically shuffle the deck. So

- 1 decayed down to where they plugged the pin into a hole and stopped the reel into a slot. 2
- 3 But they didn't know where it was going to
- 4 stop.

But they knew by the orientation of

the symbols how many symbols are on each 6 7 particular reel as to how often a specific

pattern is going to come up.

9 In other words, we took a basic

10 simple slot machine where all three reels,

11 there was only one way to win, in the middle

line, and you took each reel, let's say each 12

reel has eight symbols on it, but I mean 13

there's only two different symbols. You put a 14

15

cherry and you put a lemon: cherry-lemon,

16 cherry-lemon, cherry-lemon, all the way around

each reel, so that each reel whenever it stops 17

18 has a 50 percent chance of landing on either a

19 lemon or a cherry.

20 Then every time that you pulled the

21 handle and released it, there's eight

22 different ways you can land. It could land 23

with either cherry-cherry, 24 cherry-lemon, cherry-lemon-cherry,

42 (Pages 162 to 165)

cherry-lemon-lemon, lemon-cherry-cherry, lemon-cherry-lemon, lemon-lemon-cherry, or lemon-lemon-lemon. There's eight different outcomes, which is two to the third power, which is the way that it's determined.

You find out how many different type symbols can be in any one particular place on a reel. And you simply take, if all -- and you multiply that times the same on the next reels. So if you had three reels, it would be taken to the third power; two to the third power is eight combinations.

So if you wanted to land on all three cherries, one out of eight times it's going to land on all three cherries, and one out of eight times it's going to land on all three lemons.

That's the only time you're going to get all lemons or all cherries. And that's as simple as I can make it.

- 21 Q. And now that's done all by computer?
- 22 A. Absolutely.
- 23 Q. All right.

6

7

8

9

10 11

12

13

14

15 16

17

1

24 A. It's simulated in a computer to do

1 Q. But the player has no way to

2 actively participate and affect the outcome?

Page 168

- 3 A. Of course. And the house is
- 4 counting on that.
- 5 Q. All right. Now, are there any trips
- 6 or hidden devices in this particular machine
- 7 or these machines that you developed that, if
- 8 an operator wants to, can go in here and hit
- 9 this switch and all of a sudden we have a
- 10 poker machine; there's nothing hidden in
- 11 there, is there?
- 12 A. No, sir.
- 13 Q. There's no ability to -- I mean, you
- 14 could obviously pull out maybe some of the
- 15 software and do some changes, but what I'm
- 16 saying is, this particular program is run to
- 17 only produce Tic-Tac-Fruit?
- 18 A. The law in Ohio is very simple to
- 19 me, it was very straightforward, clear as to
- 20 what you had to do and not do. I set up the
- 21 machine for Ohio with very few adjustments in 22 it whatsoever, and none of those adjustments
- it whatsoever, and none of those adjustmentscan an operator ever change that will affect
- 24 the defense of a game in the state. That was

Page 167

1

- exactly the same thing. You don't even have
- 2 to -- you no longer have to worry about your
- 3 virtual reels and what symbols are on it;
- 4 that's unimportant. You simply got to know
- 5 what the occurrence is of a particular symbol
- 6 showing up in a particular place.

7 You know that one out of two times

- 8 you're going to get the symbol. Then if it's
- 9 the same three reels, it's the same odds, two
- 10 to the third power, one out of eight times
- 11 you're going to achieve your pattern.
- 12 Q. If I'm the best slot machine player
- 13 or the worst slot machine player in the world?
- 14 A. Yes, sir.
- 15 Q. Am I going to get the same amount of
- 16 money?
- 17 A. Yes, sir.
- 18 Q. All right. And why is that?
- 19 A. Because no amount of skill or input
- 20 to a slot machine is going to change the
- 21 outcome of what happens. Now, you can hit the
- 22 winner and get up and walk out the door before
- 23 all the coins fell out and not get your win,
- 24 but the machine would have paid.

Page 169 on purpose. Because operators would, they'd

- 2 get a hold of it and go out there and change
- 3 something, and then we'd be in trouble.
- 4 Q. So nobody can come in here and
- 5 affect any of the changes on the machine, that
- 6 you're aware of?
- 7 A. No one can get into my setup screen
- 8 and change anything which affects the defense
- 9 of the machine. And why it is legal in the
- 10 state.
- 11 Q. I talked to Mr. Riedthaler earlier
- 12 about the fact that how this machine played
- 13 and the fact that there were 60,000 tiers.
- 14 Now, can you explain the difference between
- 15 tiers and cartridges -- or tiers and plays,
- 16 excuse me.
- 17 A. Yes. The way this machine is set up
- 18 is that every single play that you make on the
- 19 machine, the computer uses a finite structure,
- 20 I don't think it's important we get into that
- 21 at this point, but it basically assures that a
- 22 complete set of permutations have been
- 23 achieved before it starts back over.
- 24 But the machine first determines

43 (Pages 166 to 169)

1

- whether it's going to be a one-line winner, a 1
- 2 two-line winner, a three-line winner, or a
- 3 four-line winner. But it's set up and
- 4 weighted to where it averages a two-line
- 5 winner, exactly. So that you get so many
- one-line winners, so many two-line winners, 6
- 7 three-line winners, and four-line winners.
- 8 But if you play it through the
- 9 entire set, which is 40 -- or 20 in this case,
- you know that you have played 40 lines, so 10
- 11 that you know that you have played an average 12
  - of two tiers and lines per play.
- 13 Now, I took that and I said, well,
- if we're going to do 30,000 plays in a 14
- 15 cartridge, in a finite cycle, then two is a
- really good even number, it's an integer, it
- makes the math very simple. I could very well 17
- 18 have had it 1.179 lines per play, but it
- 19 wouldn't have been near as simple to look at.
- So then now I know if it's a 20
- 21 30,000-play-cycle cartridge, that it has to
- eat through 60,000 tiers. So I put 60,000 22
- 23 tiers into it.
- 24 Q. And the cartridges we're talking

possible number of -- the computer goes ahead

Page 172

Page 173

- 2 and says we need this many fruit. But the
- 3 computer actually says, you know, I've got a
- 4 large number of plays to choose from, and I
- said to Mr. Riedthaler 109 million because 5
- that's what our mathematician advises. Would 6
- 7 109 million possible combinations be the
- 8 number that you're familiar with, give or
- 9 take?
- 10 A. What actually happens, Kurt, is
- that there are eight different tiers or eight 11
- 12 different particular symbols that can appear
- at any one of nine different spots. So the 13
- 14 math, again, is eight times eight times eight
- times eight -- nine times, which is 15
- 16 134 million something.
- 17 But because of the algorithm that I
- 18 wrote, what the computer is told to do is,
- 19 once it determines which tiers and how many
- 20 lines that it's going to use, it constructs a
- 21 puzzle, it puts these tiers in there in a
- 22 specific way, but it can never have a winning
- 23 combination when it's first done, because that
  - would be against the law in Ohio. We have to

## Page 171

24

- 1 about, it's really no cartridge, it's what we
- 2 call a virtual cartridge?
- 3 Not physical. Α.
- 4 Q. Correct, that's What I'm saying,
- 5 there isn't a particular cartridge, the
- computer says there's --6
- 7 I call if a finite control
- structure. That's my term for it. I actually 8
- 9 invented it.
- 10 Q. And Mr. Riedthaler called it a
- 11 cartridge; is that okay?
- Yeah, absolutely. 12 A.
- All right. Now, I know -- I don't 13
- know if this machine has the exact same 14
- 15 number, but I know Tic-Tac-Fruit comes in
- 16 different versions, and I think the versions
- 17 on the street today would range anywhere from
- 18 30,000 plays all the way down to, what's the
- 19 smallest number, 2,500?
- 20 2,500, yes, sir. Α.
- 21 Q. So there may be some that are as low
- as 2,500 out there, okay. 22
- 23 A. Correct.
- 24 Q. Okay. We also talked about the

1 make it so there are no winners when it

2 produces it. 3 If you subtract out all the possible

- 4 ways to have winning patterns on the screen
- 5 from the 134 million, you end up with 6 109 million. You have 109 million different
- 7 ways that the computer can arrange the symbols
- 8 on the screen, assuming there's eight
- 9 different symbols, which we've used in nine
- 10 spots, so that there is no winner off the bat,
- 11 the player is forced to make a decision, but
- 12 there's always at least one winning line in
- 13 there.
- 14 Q. The player can win each and every
- time? 15
- 16 A. Yes, sir.
- 17 Q. All right. And a player could lose
- 18 each and every time if they're really bad?
- 19 A. Of course.
- 20 Q. If the machine operates in the time
- 21 and they make no pick, what happens?
- 22 On these machines here, if a person Α.
- 23 does not pick and runs out of time, he cannot
- 24 possibly win that. We take the amount of the

44 (Pages 170 to 173)

1

Page 174

- $1 \quad \hbox{prize that he would have gotten, he would have} \\$
- 2 achieved if he had played it perfectly, and
- 3 throw it to the bonus. So that some other
- 4 player down the road could win that back if he
- 5 recognizes the best pattern and gets it in
- 6 time.
- 7 Q. So now if I press play and pick the
- 8 wrong location, which would be here, I have
- 9 now lost five cents on that play?
- 10 A. And it went to your bonus value.
- 11 Q. And it changed the bonus value up
- 12 here?
- 13 A. Yes, sir.
- 14 Q. Now, if you wanted to, I suppose you
- 15 could just let that bonus go to the operator,
- 16 but it's going back to give another player the
- 17 opportunity to win; is that correct?
- 18 A. That's correct. Some other player
- 19 can win that.
- 20 Q. So the player that lost, if he
- 21 wanted to play again, he still has the
- 22 opportunity to win that bonus then?
- 23 A. Yes, sir.
- 24 Q. Now, can you explain the difference

who's playing it.

2 If they had the time, if the

3 computer had decided that this was the time

Page 176

Page 177

4 that he was going to get the top tier, it

5 would put the top winning tier, in this case

6 what is that, titanium bars?

- 7 Q. Titanium bars it, looks like.
- 8 A. Okay, then there would be a winning
- 9 line somewhere on the screen with three
- 10 titanium bars with one of them replaced with a
- 11 benign symbol, one that didn't count.
- 12 Q. The wild card.
- 13 A. Then the computer would take the
- 14 other six places on the screen and start
- 15 filling them with symbols just below that, in
- 16 this case the spinner or the flip, thereby
- 17 trying to camouflage or hide from the player
- 18 the fact that the big one is in there. And
- 19 the higher the tier that you can win, the more
- 20 symbols are below it that the computer can use
- 21 to try to throw the player off. That was the
- 22 whole idea. We've tried to, you know, you've
- 23 got to find the big winner in there.
- 24 Q. So in your opinion, would it be more

Page 175

- 1 between what I would consider a win that
- 2 occurs on here with three cherries and a win
- 3 that might occur up here with the higher
- 4 dollar value, and by that what I mean is, with
- 5 three cherries it appears to be a fairly
- 6 simple pattern. Is there a difference
- 7 between, in your opinion, the level of skill
- 8 that it takes to win at three cherries and the
- 9 level that it would take to win the titanium
- 10 bars?
- 11 A. Yes, sir.
- 12 Q. All right. Can you explain to the
- 13 Commission how that occurs?
- 14 A. To make it simple, we'll assume that
- 15 we're just talking about single-line winners.
- 16 If the computer has determined that
- 17 it's going to go a single-line winner, just
- 18 somewhere there's one line in eight different
- 19 ways that it's going to win and that it is
- 20 decided that it's going to be the bottom tier,
- 21 in this case cherries, then all it can do is
- 22 put the cherries in there and that's all it
- 23 can do. It cannot create alternative patterns
- to try to screw -- to try to fool the player

1 difficult to win the higher tiers than it is

- 2 to win the lower tiers?
- 3 A. Absolutely, because the program that
- 4 I developed for it is over 6,000 lines along,
- 5 the algorithm, just to make the patterns, just
- 6 to put those symbols up there. It's told,
- 7 once it finds a place that it likes to put
- 8 that single-line winner, it then can put other
- 9 winning -- potential winning lines in there,
- 10 provided that if a player does find the right
- 11 spot to hit them. And he cannot win more than
- 12 guessing the correct answer. That's as simple
  - as the math is.

13

14 So the computer tries to fool the

- 15 player. In other words, he might see the one
- 16 under it and say, hey, there it is, he jumps
- 17 for it and hits it, he just screwed up,
- 18 because he missed the top one. So the
- 19 computer will let you -- it tries to hide
- 20 there is the fill the
- 20 those, but it will let you win a pattern that
- 21 you weren't supposed to, provided that it has
- 22 less weight than the one that you're primarily
- 23 supposed to win.
- 24 Q. And is there any pattern of the --

45 (Pages 174 to 177)

- 1 on this particular machine, 30,000, or out of
- 2 the 109 million, is there any pattern out
- 3 there that would allow for a winner being
- 4 shown without a replacement?
- 5 A. You mean where it throws a winner up
- 6 there automatically?
- 7 Q. Correct.
- 8 A. Computer can't put a winner on the
- 9 screen.
- 10 Q. All right. And that's because your
- 11 computer program, as written, won't allow it?
- 12 A. It does seven different tests after
- 13 it's decided on what the pattern is to make
- 14 sure that doesn't happen. It makes sure that
- 15 it did it right. If it doesn't, it starts
- 16 back over.
- 17 So it always presents illusion to
- 18 the player. Otherwise, if it timed out, he'd
- 19 have a winner of some sort. There's always a
- 20 loser to the player. The player must make a
- 21 decision in the nine squares. The different
- 22 places he can touch generally have different
- 23 scores to them. He's got to find the right
- 24 spot to touch in a certain amount of time that

- Page 180
- I was very happy about that. They brought
- 2 Bill in, Bill Riedthaler. First time I met
- 3 him. He's very knowledgeable, and he asked me
- 4 questions about the game, and I fully
- 5 explained every bit of this machine inside and
- 6 outside.
- 7 Q. Okay.
- 8 A. Gave him my phone number where he
- 9 could call me if he had any questions.
- 10 Q. All right. Now, under the second
- 11 box on the right-hand side of that screen?
- 12 A. Yes, sir.
- 13 Q. There is something that says game
- 14 level 0.9500?
- 15 A. Right.
- 16 Q. Now, I believe Bill described that
- 17 originally as if there's a 95 percent hold on
- 18 the machine?
- 19 A. Doesn't really work that way.
- 20 Q. Can you explain what that is?
- 21 A. .95 is a coefficient, which does
- 22 represent 95 percent. This machine is
- 23 hard-coded so that the best return the machine
- 24 can make over the life of one single cartridge

## Page 179

- 1 gives him the highest score. And sometimes
- 2 the spots don't score anything, before the
- 3 time runs out, or he loses all of it.
- 4 Q. All right. Mike, if you could stand
- 5 up, and this is the machine we've kind of been
- 6 looking at. There was a screen back in the
- 7 menu that indicated what Mr. Riedthaler said
- 8 was 95 percent?
- 9 A. Yeah.
- 10 Q. Can you get to that same screen?
- 11 A. Sure. I showed that stuff to Bill a
- 12 long time ago so he'd know where it was.
- 13 Q. He indicated that to us.
- 14 A. Yeah.
- 15 Q. Let me just ask, while you're
- 16 standing up there, you and Mr. Riedthaler met
- 17 before?
- 18 A. Absolutely. Very nice guy.
- 19 Q. And you have tried to tell him
- 20 everything you could about this machine?
- 21 A. I was invited to show my game to the
- 22 Canton City Police Department. By the time we
- 23 showed up at the time, they had now changed it
- 24 to the Stark County Sheriff's Department. And

- is 95 percent of the money that went into it.
- 2 Q. I'm going to interrupt you for a
- 3 second --

1

- 4 A. Only because of the finite structure
- 5 of this setup. There's not a compensating
- 6 algorithm.
- 7 Q. If at the end of the cartridge?
- 8 A. Yes.
- 9 Q. Nobody has put another cartridge in
- 10 place?
- 11 A. Yes.
- 12 Q. What happens to the machine?
- 13 A. It quits playing.
- 14 Q. All right. So it doesn't go on
- 15 ad infinitum, correct?
- 16 A. That's correct.
- 17 Q. So there has to be effectively a
- 18 replacement virtual cartridge for each and
- 19 every series of plays?
- 20 A. Yes, sir.
- 21 Q. All right. Go ahead, continue on
- 22 about that 95 percent.
- 23 A. Okay. What that 95 percent means is
- 24 that if a person, if you started off with one

46 (Pages 178 to 181)

1

2

17

18

1 A.

- 1 cartridge, 30,000 plays, played all 30,000
- 2 plays absolutely correctly, got the best
- 3 answer, the nine spots, and all of those
- 4 30,000 times, which the odds are just
- 5 phenomenal on, the prizes that would have been
- 6 returned to the player over the amount of
- 7 money that was played would be 95 percent,
- 8 therefore affording the owner of the machine
- 9 at least to pay the electricity on it and make
- 10 money off it.
- 11 Q. All right. Now, in your opinion,
- 12 after reading Ohio statutes, is there anything
- 13 wrong with an operator making money from a
- 14 skill-based game?
- 15 A. No, sir.
- Q. All right. Now, we know that the 16
- maximum amount that the best player could win 17
- 18 is 95 percent. Do we know what the lowest
- 19 amount is? Because originally Mr. Riedthaler
- 20 indicated, I thought, that there was a hold,
- 21 and then when I asked him a series of
- 22 questions, he did indicate that he thought if
- 23 somebody lost each and every time, well,
- obviously, the payout would be zero. 24

Page 184 big winners, regardless of what his skill

level is.

3 If it then gets to the point where 4 it's the other way around, the machine is

5 taking in less money or has paid out too much 6

money relative to the money inside of it, it 7 quits giving a player good winners. So it's

8 always looking at that.

9 It's called a compensating

10 algorithm, so that if a player had no skill

11 and he was just up there bumming around and

12 touching buttons on the machine, after a

13 while, the machine is will say, hey, this guy

14 is not doing too good, I'm going to start

15 throwing him some big winners. Well, that 16

negates all of the skill for a machine.

A person at the end of the day gets exactly the same amount of winnings as being

19 skillful as not being skillful, or even hiding

20 around the corner and hitting the button.

21 That's what Bill is used to seeing and why he

22 calls it a hold. This machine does not work

23 that way.

24 Q. All right. Tell us how it works.

Page 183

- 1 A. Bill is very familiar with machines
- 2 that are out there, and most all of my
- 3 competitors' and most of the all the machines
- 4 before this do have a hold ratio on them.
- 5 They have what's called a compensating
- 6 algorithm.
- 7 Q. What's a compensating algorithm?
- 8 A. A compensating algorithm is a
- 9 program inside of a device that generally --
- 10 inside of a device that looks like it's it has
- 11 skill but really doesn't. And that is a
- device that looks at the amount of money into 12
- the machine, the amount of money out of the 13
- 14 machine, and determines that as a ratio. And
- 15 you set up a machine with a compensating
- 16 algorithm to a hold ratio, like Bill was
- 17 talking about, say 50 percent.

18 Now, if the machine had \$1,000 had

19 gone into it and \$400 had gone out of it, the

- 20 computer is going to say, hmm, we have not
- paid out enough money for what the hold 21
- 22 percentage is set to; therefore, the next
- 23 player or the next play after that or whatever
- 24 else, I'm going to give the player some really

- Page 185 Okay. This machine, like we said,
- 2 if a player hits the worst answer or the
- 3 several worst answers to any one puzzle, if
- 4 they pick the spot that does not return
- 5 anything, for all 30,000 plays of the
- 6 cartridge, this thing is paid zero. That
- 7 player gets nothing back. It cannot
- 8 compensate on a player and make a bad player
- 9 good.
- 10 Q. So, effectively, a bad player, or
- 11 the worst player possible, the worst
- 12 Tic-Tac-Fruit player in the world would make
- 13 zero dollars if he played all the way out?
- 14 A. That's correct.
- 15 Q. On most of the machines that have
- 16 compensating algorithms, the worst
- 17 Tic-Tac-Fruit player, if a machine had a
- 18 compensating algorithm, would make the same
- 19 amount as the best player?
- 20 He would make essentially the same Α.
- 21 money that a skilled player would in exactly
- 22 the same amount over a larger amount of time.
- 23 Generally about an hour's time, the way
- 24 they're set up.

47 (Pages 182 to 185)

1	A. Yes?	1	CHAIRMAN MCNAMARA: It does.
2	Q. Then effectively	2	MR. GEARHISER: All right. No
3	A. It could be anywhere from 0 to 95.	3	further questions.
4	Q. And we don't know?	4	CHAIRMAN MCNAMARA: You may cross
5	A. We don't know.	5	·
6	Q. And we have no way to control that?	6	CROSS-EXAMINATION
7	A. We have no control over that. And	7	BY MR. LAMPKE:
		1	
8	the operator has no control over that.	8	Q. Mr. Pace?
9	Q. That's my next question, all right.	9	A. Yes, sir.
10	You can take a seat. Thank you.	10	Q. My name is Matt Lampke.
11	A. Thank you.	11	A. Hey, Matt.
12	Q. If the machine doesn't control 0 to	12	Q. Your area of designing machines is
13	95, who controls it then?	13	slot machines, generally, isn't it?
14	A. The player.	14	A. Well, I started designing pure
15	Q. All right. So the player controls	15	amusement machines.
16	the entire outcome on your machine?	16	Q. Have you designed slot machines?
17	A. Absolutely.	17	A. Yes, I have. Well, okay, yes, I
	•		
18	Q. And to you, what does the word	18	have. Yes.
19	"outcome" mean? Is it defined? Is outcome	19	Q. And you designed this not to be
20	the amount of money that you win or lose, or	20	in an attempt not to be a slot machine,
21	is the amount or is it the	21	correct?
22	A. The outcome is whether you win or	22	A. That's correct.
าว	lose the same. The prize is independent of	22	O There was a question regarding what

	Page 190		Page 192
1	if there's money still left on the machine.	1	correct?
2	Now, you don't design these to have an end	2	A. Evidently.
3	point, do you? You don't design these so you	3	Q. You said there was an average of two
4	don't have another cartridge of 10,000 game	4	tiers of line per play?
5	boards waiting, right? You design it so that	5	A. Yes, sir.
6	you do have continuous play?	6	Q. And a player does not know that,
7	A. A lot of times, the operators run	7	correct?
8	the machine until it quits playing; the	8	A. I don't believe that it's important
9	machine says it's out of plays, that's it.	9	that the player know that.
10	Q. Okay. And you normally have two	10	Q. Okay. There's no instruction that
11	cartridges, at least, in a machine?	11	tells them the average number of tiers?
12	A. This particular game here had three	12	A. I don't know why it's important.
13	cartridges at a time.	13	Q. Answer my question, please.
14	Q. Okay. At the end of one cartridge,	14	A. No, it does not tell them that
15	the first cartridge?	15	there's two tiers.
16	A. Yes, sir.	16	Q. How many game boards are on each
17	Q. If there's money still left on the	17	cartridge in this machine?
18	board, what happens to that money when it goes	18	A. A game board is the physical
19	when it completes the first cartridge and	19	components which allow the computer to
20	starts anew on a second cartridge?	20	operate.
21	<ul> <li>A. It just still has it left over from</li> </ul>	21	Q. Okay. So let me ask the question
22	the previous cartridge.	22	this way then: Tell me what that screen is up
23	Q. So it carries over?	23	there on the left machine that shows the
24	A. Of course.	24	tic-tac-toe grid. What do you call that
<u> </u>	····		
	Page 191		Page 193
1	Q. Okay. Now, you also talked about	1	screen?
2	slot machines. A slot machine is not defined	2	A. A tic-tac-toe field.
3	by one's ability to affect the winnings on the	3	Q. Okay. How many tic-tac-toe fields
4	machine, is it?	4	are there per cartridge?
5	A. Could you rephrase that?	5	A. The same number as the plays in the
6	Q. What is your definition of a slot	6	cartridge. 30,000 in this case.
7	machine under Ohio law?	7	Q. 30,000?
8	A. It is a device that does not have	8	A. Yes, sir.
9	any skill, or at least having skill is not a	9	Q. How many plays per cartridge does a
10	requirement to be a slot machine.	10	player not receive more than the amount
11	Q. Why don't I recite the definition	11	wagered?
12	for you.	12	A. I'm sorry, I don't understand.

9 any skill, or at least having skill is not a
10 requirement to be a slot machine.
11 Q. Why don't I recite the definition
12 for you.
13 A. Okay.
14 Q. It's any mechanical device capable
15 of accepting anything of value from a player
16 who gives a thing of value in the hope of
17 winning a game, the outcome of which is
18 determined largely or wholly by chance.

In that definition, there's no

lots of money or lose lots of money, is there?

It's just a chance to win money,

description of it's a slot machine if you win

I don't think so.

19

21

22

23

24

20 Q.

Α.

A.

Q.

Okay.

13 Q. How many plays can a player not 14 receive more than the amount that they wager 15 on the machine? 16 Α. I still don't understand what you're 17 saying. Okay. 18 Q. 19 Α. How many plays? 20 How many tic-tac-toe fields per 21 cartridge out of 30,000 can a player not 22 receive more than the amount they wagered? 23 You're talking about how many fields 24 are there from the 109 million different

49 (Pages 190 to 193)

	Page 194		Page 196
1	types?	1	cartridges, so only two plays out of 60,000
2	Q. No. You said there are 30,000	2	plays?
3	fields of play?	3	A. That's correct.
4	A. Correct.	4	Q. Can you even attempt to get the
5	Q. Per cartridge?	5	grand prize?
6	A. Right.	6	A. You are correct.
7	Q. Of that 30,000?	7	Q. And a skilled player cannot win more
8	A. Yes.	8	than 95 percent of the amount that they wager
9	Q. How many of those plays can a player	9	per cartridge?
10	not receive more than they wagered, as a	10	A. If a person went through an entire
11	prize, as the outcome of the game?	11	cartridge. Now, if he were playing a
12	A. I don't think I've ever calculated	12	cartridge after somebody else who had not done
13	that.	13	so well, then he would have significant amount
14	Q. Okay.	14	of points built up in his accumulator to where
15	A. I could.	15	he could actually end up better than 95
16	Q. Would it be around 80 percent that	16	percent.
17	they would not receive the amount more than	17	Q. Okay. But in your example where
18	the amount of their wager?	18	most of your vendors or permit holders let the
19	A. I wouldn't think that that number is	19	machine die, essentially, and then call you up
20	too far off.	20	for replacement cartridge, when they're
21	Q. Okay. Do you agree that the results	21	playing a cartridge, three cartridges, if a
22	of playing the game are determined by what	22	player plays all three cartridges, 90,000
23	prize that player receives?	23	plays, they still are guaranteed to lose five
24	A. No. Winning the game is the task.	24	percent, even the most skillful player?
	Page 195		Page 197
1	Q. Okay.	1	A. At least five percent they're going
2	A. It is the puzzle itself that you	2	to lose. The skilled players are only going
3	win, and it's irrelevant to the prize.	3	to lose five percent when they go through a
4	Q. Don't players play to obtain that	4	cartridge. Depending upon their skill, they
5	grand prize of, on the left-hand machine	5	could lose 100 percent of it if they had no
6	there's \$250?	6	skill.
7	A. Not everybody plays to hit the \$250	7	Q. Do you have the source code for that
8	prize. Certainly not everybody is going to.	8	machine?
9	Q. And in fact only one person out of	9	A. Yes, sir.
10	30,000 plays can a person even attempt to win	10	Q. Can you tell me what it is?
11	that grand prize?	11	A. Source code, it's written in C,
12	A. You mean one play out of 30,000.	12	primarily. I wrote the operating system in C,
13	Q. One play?	13	it was Soma assembler, the games are written
14	A. On the average, that's correct. One	14	entirely in C.
15	out of the 30,000 plays is going to have that	15	Q. Do you have that code with you?
16	grand prize.	16	MR. GEARHISER: Commissioners, at
17	Q. And you can't even attempt to get	17	this point, there are trade secrets involved
	that grand prize in any of the other plays in	18	with that. It's a patented process, this
18	and grand prize in any or and care plays in		
1	- , , , , , , , , , , , , , , , , , , ,	19	particular machine has been applied for, a
18	that cartridge?	19 20	particular machine has been applied for, a patent has been applied for, and I don't know
18 19	that cartridge?		particular machine has been applied for, a patent has been applied for, and I don't know that we can give this out to the public. If

50 (Pages 194 to 197)

22 we want to do it in camera someplace, I might

23 not object, as long as we'd have some written

24 guarantee from the Attorney General's office

22 cartridge, you could have two big prizes

24 Q. Absolutely. But only two out of two

23 within a couple of plays of each other.

Page 198 Page 200 that it would never leave their office. 95 is the cap that's ever been done on a 1 2 2 THE WITNESS: I don't have the machine. 3 actual source code. We have the object code 3 Q. Do you have some in Ohio that are that was compiled in the E-prompts, but that's 4 set at 94 percent? 4 not going to do what you want. I'll be more Anything played at a \$4.00 level in 5 5 A. than happy to work with you in any way Ohio is all 94 percent. 6 6 7 whatsoever with the source code, provided that 7 So it is being adjusted on various 8 counsel doesn't have a problem with it. 8 machines in Ohio? 9 9 MR. LAMPKE: Well, based on that No, sir. The amount that is A. objection, trade secret, I'm not going to try 10 returned to the player is based upon the 10 and get into that unless the Commission wants maximum amount, and then it is scaled down 11 11 12 to. 12 based upon a lesser denomination being played on the machine. 13 CHAIRMAN MCNAMARA: No. 13 MR. LAMPKE: Okay. I just want the 14 CHAIRMAN MCNAMARA: Let me see if I 14 Commissioners to know that we don't have the 15 -- if I could interrupt you here a second. 15 ability to test some of these statements that THE WITNESS: Yes, sir. 16 16 17 are being made. 17 CHAIRMAN MCNAMARA: You're saying that if all of your plays are \$4.00 plays? 18 BY MR. LAMPKE: 18 Can the operator of the machine 19 THE WITNESS: Yes, sir. 19 increase the guaranteed return? 20 CHAIRMAN MCNAMARA: You'll get back 20 21 Α. No, sir. 21 95 percent, or 94 percent? 22 Q. Who can? 22 THE WITNESS: 94 percent, you're 23 Only I could. And I have to 23 exactly right. A. 24 recompile the entire series in order to change 24 CHAIRMAN MCNAMARA: Okay. Now, Page 199 suppose all of your plays are \$1.00, dollar, 1 it. It's set up that way on purpose, so that 1 2 2 nobody can get in there and monkey with it and what percentage are you going to get back? 3 3 THE WITNESS: They get 90 percent. change it. Do you have machines in Ohio that 4 CHAIRMAN MCNAMARA: 90 percent. 4 Q. 5 5 are set at different percentages than 95 THE WITNESS: Yes, sir. 6 percent? 6 CHAIRMAN MCNAMARA: Suppose all of 7 The 95 percent return level applies 7 A. your plays are \$.50. to a \$4.00 play. The machine internally THE WITNESS: They get back exactly 8 scales itself for different amounts of return 87 percent. If they were to play at that one 9 9 10 based upon the denomination that they're 10 denomination throughout the life of the entire 11 playing. 11 cartridge end to end. 12 Q. Okay. If you could answer my 12 CHAIRMAN MCNAMARA: Okay, Thank 13 question, though. 13 you. 14 Α. Okay. 14 BY MR. LAMPKE: If I have all of your machines that 15 15 Q. Now, you would agree with 109 different --are in Ohio in this room, and they probably 16 16 17 couldn't fit in this room, would each machine 17 Α. 109 million. -- million different, what did you have 95 percent in that top box? 18 18 Q. You may find it at 96 on later call them, tasks? 19 A. 19 20 versions, but it's still only pays 95. 20 Α. Starting patterns with no winning 21 Q. You do have --21 lines. 22 I don't think you're ever going to 22 Q. Starting patterns, a player cannot 23 find anything other than 95 or 96. The 96 was 23 even attempt to memorize those patterns,

51 (Pages 198 to 201)

24

correct?

24

set up -- in fact, 96 has never been rewarded.

		T	
	Page 202		Page 204
1	A. Well, a lot of them are mirror	1	chance to determine the pattern, that that is
2	images of each other, it shifts around, but	2	some criteria involved in the outcome?
3	the whole object is to have a bunch of them in	3	Q. No. I'm trying to find from you
4	there to try to keep the players going.	4	right now what entails that outcome based on
5	Q. So the image that appears on each	5	Ohio's definition of play on the machine.
6	wager when you hit the play button is	6	A. I don't know.
7	different each time you play, correct?	7	Q. Okay. Let's talk about the flip
8	A. Yes, sir. I mean, it's possible	8	screen.
9	that by now there's been some duplicate	9	A. Um-hmm.
10	patterns.	10	Q. What is it?
11	Q. But not on the same machine?	11	A. It's a flip screen. It's just a
12	A. It would be a long shot.	12	bonus game that was put in there that they had
13	Q. And the player does not control what	13	to have achieved the skill of finding the
14	pattern he or she receives?	14	normal pattern, and as opposed to giving them
15	A. No, sir.	15	a specific prize for it, it gives them a prize
16	Q. So your statement that the player	16	they can change.
17	controls 100 percent of the outcome of the	17	MR. GEARHISER: Matt, I think, if
18	game is not true, because we have at least one	18	you want, I know Bill Riedthaler couldn't do
19	aspect that the player does not control,	19	it, but I'm sure Mike, if you get on here, he
20	correct?	20	can show you the flip, if that's going to help
21	A. Well, it does control the outcome of	21	you.
22	the machine. He has an opportunity, there's	22	MR. LAMPKE: Would it assist the
23	one spot that will give him the best possible	23	Commissioners?
24	return and other spots that will give him zero	24	COMMISSIONER COLONNA: It would me.
27	return and other spots that will give him zero	-	COMMISSIONER COLOMNA. It would me.

1 Q.

Page 206

- 1 loading the machine.
- 2 Q. Okay, that's fine. How many times
- 3 per cartridge will the flip screen appear, to
- 4 your knowledge?
- 5 A. I think it's around 100 -- about one
- 6 out of every 150 plays, something like that,
- 7 on this game.
- 8 Q. It is a determined number, though?
- 9 A. Well, because there's a certain
- 10 number of tiers based upon the entire
- 11 structure and the entire number of tiers
- 12 divided by how many are in there are going to
- 13 tell you how often it comes up.
- 14 Q. Okay. But it is a definite
- 15 calculable number?
- 16 A. On the average, yes, sir. And you
- 17 know how many flip screens you're going to hit
- 18 within one finite cartridge.
- 19 Q. Okay. Now, that adjust level, that
- 20 2.48 percent or that .9 -- does that affect
- 21 the flip screen, the bonus screens?
- 22 A. Well, where we were a minute ago and
- 23 what you're talking about, is that the machine
- 24 is hard set, it's at 95 percent for \$5.00

Page 208

- and the setup level.
- 2 Q. You said the operator could adjust
- 3 something; what can they adjust?
- 4 A. They can adjust a few things such as
- 5 the base of the top bonus prize. Let's say
- 6 that for a \$.50 play it was \$250.00; some
- 7 places may want that to be \$300.00 or \$400.00

8 or \$500.00; they could adjust that.

They could also adjust how much from each play was contributed to it. They can all adjust these things within a plus or minus 7 percent of the overall return to the player.

And I have that feedback factor in there. The adjust level takes that number back into the flip games, because the flip game is a game that they don't know what you they're going to get out of it anyway, provided that they have obtained the right pattern, and then it adjusts the level of that game so that the overall machine still returns 95 percent.

That is the whole idea, is to give them some adjustments if they need them, but not allow them to change the 95 factor.

Page 207

- 1 play, or 94 percent for a \$4.00 play.
- 2 If they were to change, if the
- 3 operator were allowed to change some of the
- 4 parameters such as the amount of points that
- 5 are contributed to the progressive or certain
- 6 other adjustments, very minor ones, then they
- 7 could change the overall payout of the device.
- 8 And then the math, the computer calculates the
- 9 new value that would come out, if it was left
- 10 alone. And it has an error signal. You want
- 11 to bring that screen back up?
- 12 Q. Actually, you're talking about --
- 13 A. The computer then says, well, he
- 14 made a slight adjustment here so we're going
- 15 to have to adjust it somewhere else so that it
- 16 comes out the same.
- 17 Q. You're talking about that screen,
- 18 page 8 of Department's Exhibit D?
- 19 A. Yeah. Right.
- 20 Q. So the operator can adjust the setup
- 21 level and the adjust level?
- 22 A. The setup level. They cannot ever
- 23 adjust the adjust level. The adjust level is
- 24 simply the difference between the game level

- Page 209 Now, once you're in the flip screen,
- 2 does it matter what treasure chest a player
- 3 flips over?
- 4 A. No, sir.
- 5 Q. Why not?
- 6 A. Because it's not necessary for skill
- 7 to be applied in that screen. Skill was
- 8 necessary to get to that screen, so that
- 9 screen is totally random and has nothing to do
- 10 with skill.
- 11 Q. So no matter what chest a player
- 12 flips, the computer will stop when it has
- 13 awarded what it wants to award to the player?
- 14 A. Yes.
- 15 Q. Okay.
- 16 A. Instead of giving them a
- 17 predetermined prize, if they get to that
- 18 level, they get sort of a prize that they
- 19 don't know what the level of it is.
- 20 Q. Okay. So that then as well as a
  - random feature of the game, in your words, so
- 22 a player does not control the outcome of that
- 23 screen, correct?
- 24 A. Yeah, he controls the outcome of the

53 (Pages 206 to 209)

21

- 1 screen by whether it's a winner or a loser.
- 2 Q. Okay. But you just testified that
- 3 the computer controls what prize they're
- 4 getting, so it doesn't matter what --
- 5 The computer determines the prize Α.
- 6 that they're going to get, providing that the
- 7 player exercises the proper skill to determine
- 8 the outcome of the game.
- 9 Q. Okay. So if a player hits the lower
- 10 -- I assume there are nine chests in a
- tic-tac-toe grid; is that accurate? 11
- 12 A. That's correct, sir.
- 13 Okay. So if a player picks the
- lower right chest, the 50 one, he's a 14
- 15 guaranteed winner, correct?
- I think you are correct. I think 16
- 17 the very first one or two are always winners.
- 18 Okay. So a player could never lose
- 19 by picking the first chest on that screen?
- The outcome of that particular 20
- 21 screen is irrelevant. It's already been
- 22 determined that the previous screen, the
- player had to win the game by finding the 23
- 24 right spot to touch on the screen to determine

- Page 212
- 1 doesn't matter what icon they flip over?
- 2 Α. Possibly.
- 3 So there's no skill in choosing the Q.
- 4 treasure chest, because the outcome will be
- 5 the same?
- 6 A. That's correct.
- 7 Q. Let's talk about the spinner screen.
- 8 A. Yes, sir.
- 9 What is that? Q.
- 10 A. Spinner screen is essentially the
- same thing as the flipper screen, it's just 11
- done differently. Instead of awarding a prize 12
- for the correct outcome of the game, a 13
- 14 definite number, it's simply a variable that
- 15 they don't know till they finish playing the
- 16 sub game.
- 17 Q. So the spinner looks like spokes on
- 18 a wheel?
- 19 A. Spinner has a ball that rolls around
- 20 it, and where you touch is irrelevant. They
- 21 cannot determine where that ball is going to
- 22 stop. That is its own finite structure. It
- 23 has six, seven, eight, nine, ten as
- 24 multipliers for what I call the spinner base,

## Page 211

- the outcome of the game. Now, the prize 1
- 2 simply wasn't predetermined in that case in
- 3 that game. The prize could change. But the
- person still had to win the game in order to 4
- 5 get there. This is just one of those bonus
- rounds that we give to them, because players 6
- 7 like that.
- 8 And a player does not know that Q.
- 9 their first one or two choices, or any other
- 10 choices, doesn't matter to them, correct?
- 11 Α. I still think it's irrelevant.
- 12 Could have just awarded ---
- No, it's --13 Q.
- (Multiple speakers.) 14
- Answer my question, please. 15 Q.
- 16 Α. Yes, sir.
- 17 Q. The player doesn't know that their
- choice is irrelevant? 18
- 19 Anybody that plays it a while knows
- 20 their choices are relevant in that game. It's
- 21 just a fun game.
- 22 Okay. The average player off the
- 23 street who plays it occasionally does not know
- 24 that that bonus round is a random event and it

- which is a base amount which accumulates based
- 2 upon how long it's been since you've last been
- 3 in that screen, and you have no effect
- 4 whatsoever on the outcome of that game.
- 5 It's a sub game, but you had to have
- won the game with the spinners, you would have
- 7 had to have found the spinner icons and lined
- 8 them up with the winning -- with the wild card
- 9
- symbol in order to be allowed to play that
- 10 game. And again, instead of giving you a
- 11 finite amount, a flat amount, a predetermined
- 12 amount as a win, that one gives you a variable
- 13 amount back.
- 14 Q. So again, it's a random selection by
- 15 the player, correct?
- 16 A. Yes.
- 17 And it doesn't matter what the
- 18 player selects, the result has already been
- 19 predetermined by the machine?
- 20 A. That's correct.
- 21 Q. So a player -- and I assume it's one
- 22 through twelve, is the multipliers?
- 23 A. No, the multipliers are six through
- 24 ten.

54 (Pages 210 to 213)

1 A.

1 Q. Six through ten?

- 2 A. And they're repeated twice.
- 3 Okay. So a player cannot skillfully Q.
- 4 choose a ten multiplier on that screen?
- No, sir. It's not necessary. 5 Α.
- Correct, because the computer has 6 Q.
- already randomly selected what the result is 7
- 8 going to be?
- 9 The person has already determined,
- he's already found the pattern, he's already 10
- 11 won the puzzle, and he has already solved that
- 12 puzzle. We simply, instead of giving him a
- flat amount, we give him a little fun game, 13
- 14 because he doesn't know what the amount is.
- 15 The prize is independent of the outcome of the
- 16 game.
- 17 Q. What does a player receive from
- 18 completing the screen task prior to going to
- the bonus screen? Pretend top left and top 19
- 20 right are flip screens, okay?
- 21 A. Yes, sir.
- 22 What is the prize that a player Q.
- 23 receives by putting the wild symbol in the top
- 24 middle?

- Page 216 You could have had two-way,
- three-ways, you could have won something else 2
- in combination with it. In fact, occasionally 3
- 4 you could get a flip and a spinner
- 5 simultaneously.
- 6 Q. Okay. How is the prize, the amount
- of the money determined in the flipper screen? 7
- Can you describe that again for us? 8
- 9 Yes. It has to be a minimum -- it
- has a minimum amount that it has to give you, 10
- which is usually more than the tier that's 11
- 12 directly under it, so that a player doesn't
- feel like he got less. Because if a person 13
- 14 got the two flips on here, and here's the
- 15 level of the flip, if there were two bells on
- 16 there also, he'd better get back from the flip
- 17 at least what he could have had from the bells 18 if he had made that decision.
- 19

Normally, if all the prizes are

20 incremental value, they come up, they're at

21 least twice as much as the previous symbol, so

22 the person knows that getting three lemons is

23 always at least as good as getting two lines

of cherries. That's important in a person's

## Page 215

24

- 1 A. You're saying assuming that the flip
- 2 is here and here?
- 3 Q. Yes.
- 4 A. If he puts a wild card in the
- 5 middle, he's going to win a chance to go --
- 6 it's going to take him to the spinner screen.
- 7 There's no prize that results from Q.
- just completing this task? 8
- 9 Yes. If you look on the help Α.
- 10 screen, help screen right here tells you,
- three cherries at this specific play level is 11
- going to get \$.05, \$.10, \$.15, \$.50, \$2.50. 12
- You do not know what your prize is going to be 13
- 14 for the flip. You do not know what your prize
- 15 is going to be for the spinner. You do know
- 16 what the bonus is, because it's established
- 17 right there.
- 18 Q. Okay. So the prize is only
- 19 determined once you get to that bonus screen?
- 20 There's no prize for completing the task in
- 21 the grid itself?
- 22 A. You could have had other alternative
- 23 winners.
- 24 Q. Okay.

mind when he's solving the puzzle. And that's

- 1 2 what the win chart is all about.
- 3 Does the amount wagered also Q.
- 4 determine the amount of the prize in any of
- 5 the screens?
- 6 A. There's generally a direct
- 7 multiplier for all the prizes on the screen.
- 8 And if a person loses on a screen,
- 9 does that money get applied to a bonus round,
- 10 a portion of that prize get awarded to a bonus
- round for a subsequent win? 11
- 12 The computer analyzes where the best
- 13 spot is to touch and what you're going to win
- from that, if you successfully complete the 14
- 15 play, what your prize is going to be. It also
- 16 computes what prize you're going to get based
- 17 upon the completion that you got, as an
- 18 alternative prize. If it is less than the one
- 19 you should have got, there's an imbalance
- 20 there that it takes and throws to the bonus
- 21 value for the next players.
- 22 Q. Not only to the bonus but also to
- 23 the flip and spinner?
- 24 A. No.

55 (Pages 214 to 217)

Page 218 Q. I'm asking, is it applied? 1 the games per cartridge? 1 2 No. The flip and spinner, the 2 No one is making anybody play it. Α. 3 spinner constantly increments based upon a 3 Q. Is that statement true? 4 4 setting in the machine on every play, with a Α. Well, again, I'm not sure of which 5 proportional amount based upon the value of 5 of the returns is an excess to the play, being 6 the play. The spinner does likewise. 6 as it is an irrelevant factor in Ohio law. 7 So the amount wagered does have an 7 I've never calculated how many of them on 8 8 impact on the payout? average return more than what was placed if 9 the puzzle was successfully solved. 9 It is directly proportional, the amount that you play on the game and the 10 Well, you agree that it's an 10 Q. amount that the prizes are awarded, correct. 80 percent figure? 11 11 The machine randomly selects the 12 Yeah, it could be anywhere from 70 12 Α. number of lines available per play? to 90 or something, I'd have to sit down and 13 13 14 Α. It's random with certain 14 calculate, but you're probably very close. 15 constraints. 15 So you agree with that previous Q.

Okay. The machine randomly selects 16 0. 17 the prize value to those lines on each play?

18 Again, they're finite in the way Α.

that they're controlled, so that one gets 19

20 running down lower, the other ones are going

21 to get used more.

22 Q. Okay. But it's randomly selected by

23 the machine?

24 A. That's correct.

Page 221

I have no idea how to predict what a

Page 220

1 COMMISSIONER GARDNER: I need a clarification on that. So, in other words, 2 three cherries, and that's the only thing you 3 4 have, would pay out the same amount each time, 5 or not necessarily?

6 THE WITNESS: Every single time you 7 get three cherries at one specific play level,

it's always going to return the same amount as 8

9 a prize.

10 COMMISSIONER GARDNER: All right. 11 Three lemons, three bells, the same way?

12 THE WITNESS: They increment going

13 up the chart.

COMMISSIONER GARDNER: And then if 14 15 you have combinations, you have two or three,

16 like three lemons and three bells, that will

pay out three bells, the three that's already 17

18 a predetermined amount on that menu? 19 THE WITNESS: Yes, sir.

20

BY MR. LAMPKE:

21 Q. So let me sum up the machine.

Players do not know that they're paying \$4.00 22

23 to play a 10-second game for the chance to win

more than they wagered on only 20 percent of

1 does not know.

statement then?

apologize.

16

24

Page 219

A.

Ο.

Α.

2 Well, you control the instructions Q.

Please rephrase it. And I

chance to win less than they wagered on

player thinks or does not think or knows or

80 percent of the game per cartridge?

Players do not know that they're

paying \$4.00 to play a 10-second game for the

3 on the machine, don't you, sir?

4 A. Absolutely, I do.

5 Q. Are players informed of this?

6 There's a whole lot of things A.

7 they're not informed about.

8 Q. Are they informed of this?

9 A. From the most informed --

10 Q. My question sir, is, are they

11 informed of this?

12 A. No. I've not informed anybody of

13 that fact.

14 MR. GEARHISER: Until

15 Tic-Tac-Fruit 2.

16 THE WITNESS: Right. We may have

17 that out there.

18 CHAIRMAN MCNAMARA: Mr. Lampke,

19 it's 13 minutes of 5. Can we recess by 5?

20 MR. LAMPKE: I think I'm actually

21 finished with my cross-examination.

22 MR. GEARHISER: No redirect,

23 Commissioners.

24 CHAIRMAN MCNAMARA: Do you have any

56 (Pages 218 to 221)

Page 224 Page 222 and not really worrying about winning. 1 auestions? 2 2 Sometimes in other places people are 3 more aggressive and they fight over trying to 3 **EXAMINATION** get in the seat and find the top prize. 4 BY COMMISSIONER GARDNER: 4 5 5 And I think you answered this 0. When we talked about the three Ο. question for me already: So if you have four 6 titanium bars coming across, you said that's 6 7 7 rows that are alike as opposed to one row going to happen once in 30,000 fields? 8 that's alike, the amount of money that you're 8 Α. On that particular structure, yes, 9 sir. going to win in that row is more; if you have four rows that are alike, four lemons, four 10 Q. And if it happened once in 30,000 10 11 limes, whatever, that would be more --11 fields, and let's say, I don't know if everybody knows that, but we know that now, 12 A. Are you talking about a four-line 12 maybe we're the only ones that know that, but 13 winner? 13 14 then that would be a deterrent, would it not, 14 Q. Right. 15 A. A four-line winner can only achieve 15 if that was the big payout and that's what everybody was shooting for was that big 16 in one spot, in the middle of the screen. 16 17 It's the place the four lines can have a 17 payout, knowing full well that somebody hit it common vertex. There's only one, and all the 18 after the cartridge was only used for a few 18 days or maybe 5,000 plays? 19 symbols cannot be the same, because then you'd 19 20 have four winners already on the screen. 20 You mean if the players knew that the big one was already gobbled up --21 21 Q. Right. But I'm saying, a four-line 22 winner pays more than a three-line winner, 22 Q. Exactly. 23 depending what the icons are. 23 Α. -- into a finite structure, would 24 24 they play it more? They have similar problems On the average, yes, sir. Yes, Page 223 Page 225 absolutely. 1 when we're talking about pull tabs. Again, 1 2 2 that's a bad analogy, but --Q. Okay. And when you have that 3 And that's exactly the analogy I 3 amount at the bottom that says you're going to Q. -- you won a nickel or you won \$.20 or \$.40, 4 used earlier with Mr. -- whatever his name is. 4 5 Α. Riedthaler. there's no way for them to know that, it's -- Riedthaler, that if you had in 6 predetermined, or can they go to the menu and 6 7 find out that's what they're going to win? 7 one box of pull tabs one 500 pull tab, 200 pull tab, and that was pulled very early and 8 For instance, on a \$.50 bet if you get to 8 9 9 they were in a crowded room of bingo players, three lemons -- can you go back to that one 10 field, please? 10 nobody is going to go back to that box. 11 A. Yeah, and it will tell you what There's more reasons to play it 11 12 12 than going for the top winner. A lot of you're going to get. people just like playing the game. Certainly 13 0. It will tell you you're going to 13 14 a lot of people are playing it hoping that 14 win \$.50. 15 they're going to go home with more than they 15 A. Yes, sir. 16 started. 16 Q. Or \$.25. 17 A. If you're playing \$.50, the 17 Q. Right. But they don't necessarily chase 18 cherries returns a nickel, the lemons returns 18 Α. a dime, the oranges \$.15, plums \$.50, three 19 the top prize. In fact, people in arcades 19 20 generally like playing for seat time. We set 20 bells \$2.50, and something, something, them at lower denominations in arcades, and 21 \$330.00. 21 22 22 players like to come in in the afternoon and COMMISSIONER GARDNER: Okay. Thank 23 buy a couple hours sitting there playing the 23 you. 24 machine, knowing what it's going to cost them THE WITNESS: Yes, sir.

1	MR. LAMPKE: I have two follow-up	1	keeping \$3,000 per cartridge at a \$1.00 play
2	questions, unless	2	level.
3	CHAIRMAN MCNAMARA: Go ahead.	3	Q. And you're assuming that every play
4		4	is successfully completed?
5	FURTHER CROSS-EXAMINATION	5	A. I'm assuming every play is
6	BY MR. LAMPKE:	6	successfully completed.
7	Q. How much do you average in profit	7	Q. Okay. In your experience, is that
8	per each machine?	8	the case, that every play is successfully
9	A. How much do I average, or the	9	completed?
10	Q. How much does each machine average	10	A. No, sir, it's not.
	-	11	• •
11	in profit?		Q. You're talking roughly \$3,000 profit
12	A. Per what?	12	per 30,000 plays, though?
13	Q. Per 30,000 plays.	13	A. Per cartridge, yes, sir. About
14	A. Oh, it would depend upon the	14	\$3,000 profit to the operator, which is
15	denomination in which it were played at.	15	generally split with the location.
16	Q. And that's why I'm asking for your	16	Q. 50/50 with the location?
17	average.	17	A. I don't do that. I know some do
18	A. I think the average would be the	18	60/40s, 50/50s, 40/60s.
19	average would have been I think in Ohio is	19	Q. And how many machines have you
20	somewhere around \$1.75, I think is the average	20	produced for Ohio?
21	play. I think that's right. We don't	21	A. About 900.
22	necessarily collect that data from the	22	CHAIRMAN MCNAMARA: Thank you, Mr
23	operators who run it, but some of them tell	23	Pace.
24	us.	24	THE WITNESS: Thank you very much.
	Page 227		Page 22
1	Generally, we run \$.50, \$1.00,	1	CHAIRMAN MCNAMARA: And with that
2	\$2.00, \$4.00 plays. I think the average play	2	we stand adjourned.
3	is about a buck seventy-five. If a machine	3	we stand adjourned.
4	were played at \$1.00 all the way through,	4	Thereupon, the proceedings were
	30,000 plays, the machine would return to the	1	·
5		5	adjourned at 4:52 o'clock p.m.
6	player 90 percent of the money at \$1.00. It	6	
7	is scaled on the inside to return 95 percent	7	
8	of the money to the player at a \$5.00 play	8	
9	level and 85 percent of the money at a quarter	9	
10	level.	10	
11	Q. I understand what they can make.	11	
12	But my question to you, though, is what's the	12	
13	average income?	13	
14	A. I'm going to figure out for you	14	
15	right here; one second.	15	
16	30,000 plays at \$1.00 plays means	16	
17	the machine brought in \$30,000. Not in	17	
18	reality, because it's recycled as you win and	18	
19	play. But let's say one cartridge brings in	19	
エフ	\$30,000, 30,000 plays. Now, we know that	20	
		ı ~~	
20		21	
20 21	we're returning that the operator is	21	
20 21 22	we're returning that the operator is getting to keep 10 percent of the money,	22	
20 21 22 23 24	we're returning that the operator is
